

such as drinking water sources, land use, or population. From the American Heritage Rivers initiative Home Page, a user will be able to link to the Home Pages of all participating federal agencies to access information on such topics as economic modeling, available grants, teaching guides and where to get aerial photographs and advice from experts.

An American Heritage Rivers Riverfront Internet Page will present users with a broad array of goods and services from which to choose. This electronic tool kit will be customer-driven, so that users can easily scan the tools available and quickly find and obtain those that best fit their community's interest. The Riverfront Internet Page will be divided into the following categories: facts and maps; getting started; assistance yellow pages; local action; building partnerships; and knowing your assets.

B. "Talent Bank"

A "talent bank" will share knowledge and techniques about community river restoration and revitalization efforts. The "talent bank" will build on existing expertise and provide access to creative ideas for addressing river goals and needs; real world experience in translating those ideas into practical, workable action; and expertise (professional, technical, organizational, financial or other skills) for helping carry out particular projects or other aspects of community plans. It will be available on both the Internet and in hard copy.

C. Catalog of Federal Support

A catalog of federal support will be developed and made available via the Internet, as well as in hard copy. Whether on the Internet or in hard copy, this information is intended to provide hands-on, step-by-step help to communities that are just beginning to restore and revitalize their rivers. The information will consist of brochures, "how-to" pamphlets, a bibliography, and videos.

Specific input is sought on the following:
