

accident. Therefore, the changes will not result in significant increase in the potential for, or radiological or chemical consequences from previously evaluated accidents.

5. The proposed amendment will not result in the possibility of a new or different kind of accident.

The proposed changes would not create new operating conditions or a new plant configuration that could lead to a new or different type of accident.

6. The proposed amendment will not result in a significant reduction in any margin of safety.

The use of dimensional measurement calculations to determine system volumes is the manner in which the plant has historically determined system volumes. There is no reduction in any margin of safety.

7. The proposed amendment will not result in an overall decrease in the effectiveness of the plant's safety, safeguards or security programs.

Implementation of the proposed changes will not change the safety or security programs. The proposed change to the FNMC Plan and the Compliance Plan will not decrease the effectiveness of the FNMC Plan. Use of dimensional measurement calculations to determine system volumes reflects current and approved practices. The FNMC Plan and the Compliance Plan item are being revised so that the documents will be consistent. The effectiveness of the safety, safeguards, and security programs is not decreased.

*Effective date:* This amendment will become effective upon signature of the Director, NMSS.

*Certificate of Compliance No. GDP-1:* Amendment will revise the FNMC Plan and the Compliance Plan to be consistent in the discussion of dimensional measurement calculations used to determine system volumes.
