

the Paperwork Reduction Act of 1995. To request more information on the proposed project or to obtain a copy of the data collection plans, call the HRSA Reports Clearance Officer on (301) 443-1129.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: SPRANS/CISS Uniform Data Collection Instruments (OMB No. 0915-0169)—Extension and

Revision—The Health Resources and Services Administration (HRSA) proposes to revise and reformat the Maternal and Child Health Special Projects of National and Regional Significance (SPRANS) and Community Integrated Service Systems (CISS) Uniform Data Collection Instruments. These revised instruments will be used to include information from grantees to comply with the legislative mandate for an annual report to Congress, and to include data for meeting the requirements of the Government Performance and Results Act (GPRA).

The SPRANS/CISS Programs complement and improve the MCH Block grants to the 50 states and 9 territories under Title V of the Social Security Act. Approximately 600 grants are awarded annually in the SPRANS/CISS programs, usually to state and local health departments, universities and other institutions of higher learning, and a smaller number of non-profit and

for-profit organizations or associations. There are four separate SPRANS/CISS Uniform Data Collection Instruments, reflecting variations in the four basic types of SPRANS/CISS grantees and their unique data needs: (1) Training, (2) Research, (3) Data, and (4) Other Discretionary Programs.

The revisions to these data collection instruments are designed to ensure the collection of data needed by program managers to prepare the mandated annual report to Congress, and may be designed to ensure the collection of data required by GPRA without the introduction of additional collection instruments. We estimate that the burden hours will be decreased by more than 10%, due to further improvements to the instruments based on lessons learned from the initial use of the form, as well as improved technology that will be used to collect the data. Estimates of burden to complete the Uniform Data Collection Instruments are as follows:

Type of form	Number of respondents	Responses per respondent	Burden hours per response	Total burden hours
Training	150	1	1.75	262.5
Research	50	1	1.75	87.5
Data	30	1	1.75	52.5
Other Discretionary Programs	350	1	1.75	612.5
Total	580	1	1.75	1,015
