

It is anticipated that approximately \$6 million will be available for grant awards during FY 1998, contingent upon availability of appropriated funds. Multiple year funding of grant awards is expected, with out-year funding also contingent upon the availability of appropriated funds, progress of the research, and programmatic needs. It is expected that most awards will be from one to three years and that there will be one award for approximately \$4 million per year (total costs) with the remaining 4-6 awards in the \$200 thousand to \$400 thousand per year (total costs) range. The dissemination of materials and research data in a timely manner is essential for progress towards the goals of the DOE Human Genome Program. OHER requires the timely sharing of resources and data. Applicants should, in their applications, discuss their plans for disseminating research data and materials which may include, where appropriate, putting cell lines, probes, sequence data, etc., into public repositories. Funds to defray the costs of disseminating materials or submitting data to repositories are allowable; however, such requests must be adequately justified.

Applications will be subjected to formal merit review (peer review) and will be evaluated against the following evaluation criteria which are listed in descending order of importance codified at 10 CFR 605.10(d):

1. Scientific and/or Technical Merit of the Project;
2. Appropriateness of the Proposed Method or Approach;
3. Competency of Applicant's personnel and Adequacy of Proposed Resources;
4. Reasonableness and Appropriateness of the Proposed Budget.

The evaluation will include program policy factors such as the relevance of the proposed research to the terms of the announcement and an agency's programmatic needs. Note, external peer reviewers are selected with regard to both their scientific expertise and the absence of conflict-of-interest issues. Non-federal reviewers will often be used, and submission of an application constitutes agreement that this is acceptable to the investigator(s) and the submitting institution.

Information about development and submission of applications, eligibility, limitations, evaluation, selection process, and other policies and procedures may be found in the ER Application Guide for the Office of Energy Research Financial Assistance Program 10 CFR Part 605, which is available on the World Wide Web at:

<http://www.er.doe.gov/production/grants/grants.html>. The ER, as part of its grant regulations, requires at 10 CFR 605.11(b) that a grantee funded by ER and performing research involving recombinant DNA molecules and/or organisms and viruses containing recombinant DNA molecules shall comply with the National Institutes of Health "Guidelines for Research Involving Recombinant DNA Molecules" (51 FR 16958, May 7, 1986), or such later revision of those guidelines as may be published in the **Federal Register**.

The Catalog of Federal Domestic Assistance Number for this program is 81.049 and the solicitation control number is ERFAP 10 CFR Part 605.

Issued in Washington, DC on June 20, 1997.
