SUPPLEMENTARY INFORMATION:

I. Background

Effective December 31, 1997 (62 FR 23834, May 1, 1997), seven industry groups (as described by their standard industrial classification (SIC) code) will be added to the list of industry groups subject to the reporting requirements set forth in section 313 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA) and section 6607 of the Pollution Prevention Act of

1990 (PPA). These added industry groups are metal mining (SIC code 10, except 1011, 1081, and 1094), coal mining (SIC code 12, except 1241), electric utilities (SIC codes 4911, 4931, and 4939 (limited to facilities that combust coal and/or oil for the purpose of generating electricity for distribution in commerce)), commercial hazardous waste treatment (SIC codes 4953 (limited to facilities regulated under the RCRA Subtitle C, 42 U.S.C. section 6921 *et seq.*)), chemicals and allied products-wholesale (SIC code 5169), petroleum bulk terminals and plants (also known as stations)-wholesale (SIC code 5171), and solvent recovery services (SIC code 7389 (limited to facilities primarily engaged in solvents recovery services on a contract or fee basis)). Reporting by facilities within these industry groups will begin with the 1998 reporting year. The first reports by these facilities must be submitted by July 1, 1999.

II. Development of Industry Guidance

EPA is preparing guidance documents to familiarize newly added industry groups with the basic EPCRA section 313 reporting requirements and to provide interpretive guidance specific to each newly added industry group. In the Agency's continuing outreach efforts to provide technical and interpretive guidance to the regulated community, draft guidance documents will be distributed for comment and review. Written comments on the guidance documents are due on or before August 20, 1997. EPA will then meet with reviewers that wish to discuss the comments. EPA will then incorporate technical comments, as appropriate. It is anticipated that at least two training workshops in each EPA region will be provided subsequent to the completion of the document review process to further prepare facilities for the submission of their EPCRA section 313 reports.

Persons interested in participating in the review of these guidance documents are invited to contact Michael Hart (202-260-1576 or e-mail: hart.michael@epamail.epa.gov) on or before July 14, 1997.
