Intent To Prepare a Draft Environmental Impact Statement (DEIS) for the San Antonio Flood Control Study, Los Angeles and San Bernardino Counties, California

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice of intent.

SUMMARY: This feasibility study investigates the flooding problems on San Antonio Creek south from San Antonio Dam to the Creek's confluence with Chino Creek. The two creeks are tributaries to the Santa Ana River. During the 40 years since its construction, the ability of the system to provide a very high-level of protection has diminished as a result of urban runoff. The result could be creek overflows from very large storms.

FOR FURTHER INFORMATION CONTACT: Questions about the proposed action and DEIS can be answered by Ronald F. Lockmann, CESPL-PD-RN, Box 532711, Los Angeles, California 90053-2325, phone (213) 452-3851.

SUPPLEMENTARY INFORMATION:

1. Proposed Action

The tentatively selected plan for flood control in San Antonio Creek consists of reoperation of the San Antonio Dam for flood protection. The releases at higher events would be reduced and the increased pool would be held for 24

hours. This action would reduce the downstream flow and provide additional infiltration.

2. Alternatives

Alternatives considered during the planning process include: Parapet walls; maintaining the present operational plan (no action); and a seasonally expanded pool for various durations to reduce discharges into the downstream channel.

3. Scoping Process

A scoping (public) meeting will be held at 7:00 pm July 15, 1997 at Lehigh Elementary School, Montclair to obtain community input to assure that all concerns are identified and addressed in the DEIS.

4. Future Public Meetings

Additional public meeting(s) will be held, if warranted at times and places to be specified at the above meeting and/or in future mailings.

Gregory D. Showalter,

Army Federal Register Liaison Officer.
