## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Disease Control and Prevention

[Announcement Number 787]

### Research and Demonstration Programs in Surveillance, Prevention, and Control of Healthcare-Associated Infections and Antimicrobial Resistant Infections at Children's Hospitals

#### Introduction

The Centers for Disease Control and Prevention (CDC) announces the availability of funds in fiscal year (FY) 1997 for a cooperative agreement program to develop research and demonstration programs in the surveillance, prevention, and control of healthcare-associated infections, antimicrobial resistant infections, and outcomes research at children's hospitals.

CDC is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a national activity to reduce

morbidity and mortality and improve the quality of life. This announcement is related to the priority area of Immunization and Infectious Diseases. (For ordering a copy of Healthy People 2000, see the section Where To Obtain Additional Information.)

#### Authority

This program is authorized under Sections 301(a), and 317(k)(2) of the Public Health Service Act, as amended [42 U.S.C. 241(a) and 247b(k)(2)]. Applicable program regulations are found in 42 CFR Parts 51b and 52, Grants for Preventive Health Service and Grants for Research Projects.

#### Smoke-Free Workplace

CDC strongly encourages all grant recipients to provide a smoke-free workplace and to promote the nonuse of all tobacco products, and Public Law 103-227, the Pro-Children Act of 1994, prohibits smoking in certain facilities that receive Federal funds in which education, library, day care, health care, and early childhood development services are provided to children.

#### Eligible Applicants

Assistance will be provided only to public and private nonprofit organizations whose members include representatives of children's hospitals that have an interest in infection control, hospital epidemiology, antimicrobial use and resistance, and development and evaluation of benchmark or outcome measurements for patients at children's hospitals. These organizations must include members involved with hospitals, health systems, academic medical centers, and other entities which provide both hospital-based medical care and ambulatory care to a defined pediatric population.

Applicants should demonstrate that they have a close relationship with a large number (N>40) of children's hospitals and that infection control personnel at these member hospitals are interested in participating in collaborative research studies to improve infection control programs in children's hospitals. Documentation of eligibility status including 501(c)(3) certification and listing of 10 or more relationships with children's hospitals must appear in the Abstract or Background and Need sections of Application Content.

**Note:** Effective January 1, 1996, Public Law 104-65 states that an organization described in section 501(c)(4) of the Internal Revenue Code of 1986 which engages in Lobbying activities shall not be eligible for the receipt of Federal funds constituting an award, grant
