Approval and Promulgation of Air Quality Implementation Plans; Virginia: Approval of Group III SIP and Coke Oven Rules for Particulate Matter

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve two State Implementation Plan (SIP) revisions submitted by the Commonwealth of Virginia. Approval of Virginia's Group III SIP would establish an ambient air quality standard for particulate matter smaller than 10 micrometers in diameter (PM-10); provide regulatory definitions for "particulate matter," "particulate matter emissions" "PM10," "PM10 emissions,"

and "total suspended particulate matter" (TSP); and modify rules regarding air pollution episodes to include PM-10 as well as TSP action levels. Approval of the coke oven provisions would provide for limits on mass emissions, opacity, and fugitive dust from nonrecovery coke works.

In the final rules section of this **Federal Register**, EPA is approving the State's SIP revisions as a direct final rule without prior proposal because the Agency views this as a noncontroversial SIP revision and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this proposed rule, no further activity is contemplated in relation to this rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time.

DATES: Comments must be received in writing by August 20, 1997.

ADDRESSES: Comments may be mailed to Makeba A.
