

The purpose of the FEIS was to analyze and disclose the potential environmental consequences of the disposal of real property and the reuse of the base outside the area retained by the US Air Force.

The Air Force issued a Record of Decision (ROD) on May 19, 1995, which documented a series of decisions in regard to parcel disposal, the organizations or agencies to receive certain parcels; the means for parcel disposal (Federal transfer, public benefit conveyance, negotiated sale, or public sale); and the mitigation measures to be adopted. The Air Force issued a Supplemental Record of Decision (SROD) on April 23, 1996, which clarified that the base electrical system would be disposed of by negotiated sale. The SROD also, made modifications to the ROD concerning the size of various parcels of land to be transferred to the Army and the Rickenbacker Port Authority (RPA).

Since the SROD was issued, the RPA and other Federal agencies have requested that the SROD and ROD be revised to reconcile certain property disposal decisions. Consequently, this RSROD adjusted the acreage of various parcels of land and clarified the intended disposal of the water and waste water sewer system to the RPA.

These disposal activities and any associated mitigation measures will proceed with minimal adverse impact to the environment. This action conforms with applicable Federal, State and local statutes and regulations, and all reasonable and practical efforts have been incorporated to minimize harm to the local public and the environment.
