

on Channels 14 and 69 to take special precautions to avoid interference to adjacent spectrum land mobile operations. This requirement applies to all new Channel 14 and 69 TV broadcast stations and those authorized to change channel, increase effective radiated power (ERP), change directional antenna characteristics such that ERP increases in any azimuth direction or change location, involving an existing or proposed channel 14 or 69 assignment. Section 73.687(e)(4) requires these stations to submit evidence to the FCC that no interference is being caused before they will be permitted to transmit programming on the new facilities. The data is used by the FCC to ensure proper precautions have been taken to protect land mobile stations from interference. It will also both increase and improve service to the public by broadcasters and land mobile services operating in certain parts of the spectrum.

OMB Control No.: 3060-0611.

Expiration Date: 07/31/2000.

Title: Section 74.783—Station identification.

Form Number: None.

Estimated Annual Burden: 26 hours; 0.166 hour per respondent; 151 respondents.

Description: Section 74.783(b) requires television translator stations, whose station identification is made by the television station whose signals are being rebroadcast by the translator, to furnish current information with regard to the translator's call letters and location, and the name, address and telephone number of the licensee to be contacted in the event of malfunction of the translator. Section 74.783(e) requires a low power television (LPTV) station to submit a certification with its request for a four-letter call sign. This certification must include a statement that it has placed a firm equipment order, which includes a down payment for such major components as a transmitter or a transmitting antenna, that physical construction is under way at the transmitter site, or that the station has been constructed. The certification requirement will effectively enable Commission staff to award four-letter call signs to those permittees most likely to be constructed and operated.

Federal Communications Commission.

William F. Caton,

Acting Secretary.
