NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (97-109)]

Notice of Prospective Patent License

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of prospective patent license.

SUMMARY: NASA hereby gives notice that Dow-United Technologies Composite Products, Inc., of Wallingford, CT 06492-1843, has applied for a partially exclusive license to practice the inventions described and claimed in NASA Case Numbers: LAR 15383-1, entitled "Method of Preparing Polymers with Low Melt Viscosity"; LAR 15534-1, entitled "Method of Preparing Polymers with Low Melt Viscosity"; and LAR 15534-2, entitled "Method of Preparing Polymers with Low Melt Viscosity"; for which United States Patent Applications were filed by the United States of America as represented by the Administrator of the National Aeronautics and Space Administration. Written objections to the prospective grant of a license should be sent to Langley Research Center.

DATES: Responses to this notice must be received by October 10, 1997.

FOR FURTHER INFORMATION CONTACT:

George F. Helfrich, Patent Counsel, Langley Research Center, Mail Stop 212, Hampton, VA 23681-0001, telephone (757) 864-3227, fax (757) 864-9190.

Dated: August 4, 1997.

Edward A. Frankle,
General Counsel.

[Notice (97-108)]

Notice of Prospective Patent License

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of prospective patent license.

SUMMARY: NASA hereby gives notice that UE Systems, Inc., Elmsford, New York, has applied for an exclusive license for the patent application entitled "Ultrasonic Imaging System," KSC-11909, which is assigned to the United States of America as represented by the Administrator of the National Aeronautics and Space Administration. Written objections to the prospective grant of a license to UE Systems, Inc. should be sent to Beth Vrioni, John F. Kennedy Space Center, Mail Code DE-TPO, Kennedy Space Center, FL 32899.

DATES: Responses to this notice must be received by October 10, 1997.

FOR FURTHER INFORMATION CONTACT:

Beth Vrioni at (407) 867-2544.

Dated: August 4, 1997.

Edward A. Frankle,
General Counsel.

BILLING CODE 7510-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-267]

Notice of Termination

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Termination of the Public Service Company of Colorado Fort St. Vrain Nuclear Generating Station License.

SUMMARY: The U.S. Nuclear Regulatory Commission is noticing the termination of the Public Service Company of Colorado's Fort St. Vrain (FSV) Nuclear Generating Station, Unit 1, License DPR-34, (NRC Docket File No. 50-267), located near Platteville, Colorado.

Background

The Nuclear Regulatory Commission (NRC) is terminating the operating license of the decommissioned Fort St. Vrain Nuclear Generating Station (License DPR-34) near Platteville, Colorado, and releasing the site for unrestricted use, as requested by the licensee, Public Service Company of Colorado.

The nuclear power plant, located 35 miles north of Denver, received its operating license in 1973. It was a high-temperature, gas-cooled reactor, capable of producing 330 megawatts of electricity.

NRC conducted 24 inspections at Fort St. Vrain in connection with the company's decommissioning activities. The most recent inspections (inspections conducted from February 1996 through January 1997) focused on supporting the final radiation survey review. The NRC's confirmatory radiation survey affirmed that the licensee's final survey results demonstrated that the site met the Commission's criteria for unrestricted release.

On March 10, 1997, the NRC noticed the receipt of the Fort St. Vrain Termination Plan and provided an opportunity for a hearing, but no requests were received. A public meeting was held on December 3, 1996, in the vicinity of the plant, as required under 10 CFR 50.82(a)(9)(iii), to discuss the termination of the license and no adverse comments were received.

On the basis of the decommissioning activities conducted by the licensee, the NRC review of the licensee's termination survey final report, the results of the NRC inspections, and the results of NRC confirmatory surveys, the NRC concludes that the decommissioning process is complete and the site and facility are suitable to be released for unrestricted use.

Action

Consistent with NRC's revised decommissioning regulations, specifically 10 CFR 50.82(a)(11), the NRC has released the facility and site for unrestricted use and terminated the NRC Nuclear Power Facility License DPR-34 (NRC Docket File No. 50-267).

FOR FURTHER INFORMATION CONTACT: Mr. Clayton L. Pittiglio, Project Manager, Low-Level Waste and Decommissioning Projects Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Mail Stop T-7-F27, Washington, DC 20555-0001. Telephone (301) 415-6702.

Dated at Rockville, MD this 5th day of August 1997.

For the U.S. Nuclear Regulatory Commission.

John W. N. Hickey,

Chief, Low-Level Waste and Decommissioning Projects Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards.
