

comments to CDC, Desk Officer; Human Resources and Housing Branch, New Executive Office Building, Room 10235; Washington, DC 20503. Written comments should be received within 30 days of this notice.

**Proposed Projects**

1. Cost and Impact of Illnesses and Injuries Associated with Child Care Attendance—New—This is a revision of a previously submitted information collection. This is a longitudinal follow-

up telephone survey of parents of children attending large (15 children/center) day care centers and family day care homes (7 children) in order to (1) determine the extent to which the size of day care centers are associated with the rates of illnesses and injuries for children attending day care; (2) to estimate the costs of illnesses and injuries for children attending small and large day care centers; (3) to compare the health of the family members of

children attending small versus large day care centers; and (4) to estimate the costs of illnesses for the family members of children attending small versus large day care centers. The analyses of the proposed survey data will allow CDC to evaluate the relative costs and benefits of attending small as opposed to large day care centers. The information will provide valuable data to policy makers, medical professionals and scientists. The total annual burden is 624.

Respondents	Number of respondents	Number of responses/ respondents	Average burden/ response (in hours)
Parents (Monthly) .....	241	1	0.583
Parents (Annual) .....	241	11	.167
Child care provider .....	81	1	.5

Dated: August 13, 1997.
