

particularly for privately-owned sites where the landowners objected to the boundaries as proposed. The proposed action for overall park management remains unchanged.

SUPPLEMENTARY INFORMATION: This Final Environmental Impact Statement for the General Management Plan presents a proposal and two alternative strategies parkwide and site-specific, for guiding future management of the national historical park. The major subject areas are natural and cultural resources, public use, nonfederal lands, and park management and operations. Many overall actions would be designed to unify park sites, upgrade interpretation, and help visitors recognize the connection between the park's individual sites. Nez Perce life ways would be respected. Plans would be developed to manage resources and vegetation, eliminate exotic and noxious plants, and reintroduce native species. The park would continue to work with local governments on issues that could affect park resources. Nez Perce people would be encouraged to participate in decisions about park planning,

management, and operation. Alternative 1 is a continuation of current management practices, often referred to as a "no action" alternative. Alternative 2 is a minimum requirement in terms of lower cost improvements and minimum protection and safety actions. Alternative 3 goes beyond the minimum requirements alternative, building on the initiatives of alternative 2. The proposed actions for overall management would retain the general management direction of the park, but appropriate individual management techniques would be applied in certain cases. Incremental steps would be taken to improve visitor services and operations. More cooperative agreements and other partnership mechanisms would be developed as needed to protect resources, include Nez Perce people in park management, and improve interpretation. Some facilities would be rehabilitated or expanded, modest developments would be added at some sites to meet requirements, and some historic structures would be adaptively used. The site-by-site proposed action varies with the site. The DEIS evaluated the potential environmental impacts associated with the strategies comprising the three alternatives. The official responsible for a decision on the proposed action is the Regional Director, Pacific West Region, National Park Service.

Dated: August 11, 1997.

Deputy Regional Director, Pacific West Region.
