#### SUPPLEMENTARY INFORMATION:

##### Proposed Project

"A Survey of Clinical Decision Support Systems (CDSS)." The AHCPR intends to conduct a survey to gather the opinions of front-line physicians, nurses, and medical information systems personnel regarding the use, appropriateness, and effectiveness of clinical decision support systems (CDSS); and to determine how well clinical practice guidelines are integrated into these systems.

This proposed study is a part of a larger project to identify and describe CDSS currently available in the health market, and to assess the use of CDSS by health care providers in diagnosing and treating patients as well as identifying barriers to using CDSS. It will assess if, and how, clinical practice guidelines are being successfully integrated into CDSS and will identify any changes needed for the guidelines to play a more significant role in future systems.

The information collected will indicate:

- If, and how, CDSS and clinical practice guidelines impact the treatment and outcome of patient care;
- What, if any, are the barriers to CDSS and the guidelines from being accepted by health care providers;
- What types of health care personnel are utilizing guidelines in the treatment of their patients and what types of health care personnel could benefit from such products; and
- Assess how successfully guidelines are being integrated into CDSS and their effectiveness when accessed as part of CDSS; and what needs to be modified/changed to facilitate the use of guidelines in CDSS.

The respondents' comments will provide AHCPR with information on (1) if and how CDSS may improve the quality and outcome of care and promote cost-containment, and (2) whether and how to better incorporate guidelines into the development and use of CDSS.

#### Method of Collection

The survey will be conducted using a computerized telephone interview system (CATI). Burden estimates follow:

*Number of Respondents:* 80.

*Number of Surveys Per Respondent:* 1.  
*Average Burden Per Respondent:* 25-30 minutes.

*Estimated Total Burden:* 40 hours.

#### Request for Comments

Comments are invited on: (a) The necessity of the proposed collection; (b) the accuracy of the Agency's estimate of burden of the proposed collection of information; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information upon the respondents, including the use of automated collection techniques or other forms of information technology.

Copies of these proposed collection plans and instruments can be obtained from the AHCPR Reports Clearance Officer (see above).

Dated: August 13, 1997.
