#### SUPPLEMENTARY INFORMATION

*Abstract.* NSF Survey of Research and Development Funding and Performance by Nonprofit Organizations (NPOs) will collect information on the science and engineering (S&E) research and development (R&D) activities of nonprofit organizations for the two most recently completed years. (On a historic note, a prior study with similar objectives was conducted in 1973.) The purposes of the study are to: (1) Develop estimates of the amounts of R&D funding provided by NPOs and the types of organizations supported; (2) develop estimates of the amount of R&D performed by NPOs; and (3) develop estimates of R&D employment in NPOs. Two different survey questionnaires will be used. R&D performers will be asked for R&D expenditures by source of funds, by field of science and engineering, by category of work (Basic, Applied, Development), by state, and amounts expended for capital improvements, and for employment. R&D funders will be asked for amount of S&E R&D they fund at various categories of R&D performers. The information is needed to update available data on the R&D activities of the nonprofit segment. The Gallup Organization will conduct the study for NSF.

Two samples will be drawn: one of NPO R&D performers and a second of NPO R&D funders. The R&D performers'
