National Institute of Environmental Health Sciences; National Toxicology Program Request for Comments on Chemicals Nominated to the National Toxicology Program (NTP) for Toxicological Studies—Recommendations by the Interagency Committee for Chemical Evaluations and Coordination (ICCEC) for Study, No Studies, or Deferral To Obtain Further Supporting Information

Background

As part of an effort to earlier inform and obtain public input into the selection of chemicals for evaluation, the National Toxicology Program (NTP) routinely seeks public input on (1) chemicals nominated to the Program for toxicological studies, and (2) the testing recommendations made by the Interagency Committee for Chemical Evaluation and Coordination (ICCEC). Summaries of the ICCEC's recommendations and public comments received on the nominated chemicals are next presented to the NTP Board of Scientific Counselors for their review and comment in an open, public session. ICCEC recommendations, Board recommendations, and public comments are incorporated into recommendations that are then submitted to the NTP Executive Committee. The Executive Committee reviews and approves action to move forward to test, defer, or delete each of the nominated chemicals for the various types of study, and recommends priorities.

Request for Comment

Interested parties are encouraged to comment and provide information on the chemicals listed below. The Program would welcome receiving toxicology and carcinogenesis information from completed or ongoing studies, and information on planned studies, as well as current production data, human exposure information, use patterns, and environmental occurrence for any of the chemicals listed in this announcement. To provide comments or information, please contact Dr. William Eastin at the address given below within 60 days of the appearance of this announcement.

At its meeting on August 15, 1997, the ICCEC reviewed and recommended 4 chemicals or substances for toxicity and/or carcinogenicity studies, recommended that no studies be performed on 5 chemicals, and deferred 4 chemicals pending receipt of test data
