Castle Peak Area Travel Management Designations and Use Restrictions

AGENCY: Bureau of Land Management, Department of the Interior.

ACTION: Notice of change in off highway vehicle use designations, and area closure and use restrictions.

SUMMARY: Notice is hereby given on changes in the off highway vehicle use designations and travel related rules of conduct on approximately 119,631 acres

of public land administered by the Grand Junction District, Glenwood Springs Resource Area of the Bureau of Land Management. This order closes public lands in the Bull Gulch and Castle Peak Wilderness Study Areas to use and operation of all motorized and mechanized vehicles, limits use of said vehicles to designated routes on all other public lands in the Castle Peak planning area, and prohibits use of motorized vehicles in specified areas during the fall and winter seasons. The motorized and mechanized travel designations and use restrictions are established pursuant 43 CFR 8341.2(a), and 43 CFR 8464.1. These designations and use restrictions modify current designations established in the Glenwood Springs Resource Area Resource Management Plan, record of decision signed in January 1984, and supersede general rules of conduct for recreational use of public lands in the affected area.

The affected public lands are bounded by the Colorado River, Eagle River and Highway 131 and are located in Townships 2, 3, 4, and 5 South, Ranges 83, 84, 85 and 86 West of the 6th Principal Meridian, Eagle County, Colorado.

EFFECTIVE DATES: The designations will be effective as of the date of approval of the Castle Peak Travel Management Plan. The use restrictions shall be effective as of September 15, 1997 until rescinded or modified by the Authorized Officer.

SUPPLEMENTARY INFORMATION: Public lands in the Castle Peak area contain important and fragile resource values and provide a variety of outdoor recreational opportunities. Changes in the current travel designations are needed to protect erosive soils, wintering wildlife habitat, sensitive water quality management areas, cultural resources, important scenic values, semi-primitive non-motorized settings, and wilderness values. Growing recreational use in the area is expected to continue, and travel management is needed to prevent conflicts between users and unacceptable impacts on resource values, while continuing to provide a variety of recreational opportunities.

These travel designations and use restrictions are the result of the Castle Peak Travel Management Plan. Public comments were received throughout the planning process beginning in April 1996, which included scoping of the issues and potential solutions, review of alternatives and the plan proposed in September 1996, and review of the final plan with record of decision approved
