

surveys on the Applicant's property did not reveal habitat occupied by ABM; however, the Applicant is seeking compliance with the Act in an abundance of caution. The Applicant's property does not contain designated critical habitat for the ABM.

Construction of the Project may result in the death of, or injury to, ABM. Habitat alterations due to condominium placement and subsequent human habitation of the Project may reduce available habitat for food, shelter, and reproduction.

The EA considers the environmental consequences of several alternatives. One action proposed is the issuance of the ITP based upon submittal of the HCP as proposed. This alternative provides for restrictions that include conserving almost 75 percent of the Project's dune fields (essentially primary and secondary dunes), establishment of one walkover structure across primary and secondary dune features, a prohibition against housing or keeping pet cats, ABM competitor control and monitoring measures, scavenger-proof garbage containers, restoration of dune systems, the creation of educational and information brochures on ABM conservation, and the minimization and control of outdoor lighting. Further, the HCP proposes to provide an endowment of \$17,773 to acquire ABM habitat offsite or otherwise perform some other conservation measure for the ABM. The HCP provides a funding source for these mitigation measures, as well as monitoring of the HCP, should an ITP be issued by the Service. Another alternative is consideration of a different project design that might result in more impacts to the ABM and its habitat. A third alternative is no-action, or deny the request for authorization to incidentally take the ABM.

As stated above, the Service has made a preliminary determination that the issuance of the ITP is not a major Federal action significantly affecting the quality of the human environment within the meaning of Section 102(2)(C) of NEPA. This preliminary information may be revised due to public comment received in response to this notice and is based on information contained in the EA and HCP. An appropriate excerpt from the FONSI reflecting the Service's finding on the application is provided below:

Based on the analysis conducted by the Service, it has been determined that:

- Issuance of the ITP will not appreciably reduce the likelihood of survival and recovery of the effected species in the wild.

- The HCP contains provisions which sufficiently minimize and/or mitigate the impacts of issuing the ITP.

- Issuance of the ITP would not have significant effects on the human environment in the project area.

- The proposed take is incidental to an otherwise lawful activity.

- Adequate funding will be provided to implement the measures proposed in the submitted HCP and authorizing ITP.

The Service will also evaluate whether the issuance of a Section 10(a)(1)(B) ITP complies with Section 7 of the Act by conducting an intra-Service Section 7 consultation. The results of the biological opinion, in combination with the above findings, will be used in the final analysis to determine whether or not to issue the ITP.
