SUPPLEMENTARY INFORMATION: In 1996, the Agency for Toxic Substances and Disease Registry (ATSDR), an operating division of the U.S. Department of Health and Human Services, launched a Child Health Initiative. A Child Health Workgroup was appointed by ATSDR's external Board of Scientific Counselors. Members of the workgroup were selected for their knowledge of children's environmental health. The workgroup assessed ATSDR's activities as they pertain to individuals during prenatal life, infancy, children, and adolescence. The workgroup reviewed the four divisions of ATSDR separately. This effort included the review of published goals and objectives for each division, recent annual reports, and many other publications from each division. For each division, a meeting was held between members of the workgroup and the leadership of the division.

The workgroup members determined that, although key information gaps could be identified, the most important activity was to offer a critique of current processes and suggestions for change that would improve the quality of the data, the pediatric impact of prevention, and the future benefit of the ATSDR's activities for the children being served. The availability of draft report for public comment was announced in the **Federal Register** on June 17, 1997 (62 FR 32812). The availability of the final report documenting this effort, Healthy Children-Toxic Environments, is being announced through this **Federal Register** notice.

Dated: September 24, 1997.
