Pertinent Questions

In view of the discussion above, please respond to the following questions:

(1) Should the Coast Guard require third party certification, similar to that required for commercial vessel navigation lights, so that boat builders, boat owners, marine surveyors and officials conducting law enforcement boarding would have a means for determining whether navigation lights sold for use or installed on recreational boats complied with applicable requirements in the Navigation Rules?

(2) What are the expected costs and benefits of regulations requiring manufacturers and importers of navigation lights used on recreational boats to construct and label their lights in accordance with a recognized industry standard?

(3) Is it appropriate for the Coast Guard to impose a third party certification requirement for navigation lights sold for installation on recreational boats?

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; extension of the public comment period.

SUMMARY: On September 2, 1997, EPA published a proposed rule (62 FR 46234) proposing to determine that the Santa Barbara moderate ozone nonattainment area has not attained the 1-hour ozone national ambient air quality standard (NAAQS) by the Clean Air Act (CAA) mandated attainment date for moderate nonattainment areas, November 15, 1996.
