SUPPLEMENTARY INFORMATION:

I. Abstract

The Bureau of the Census produces statistics used to monitor activity in the large and dynamic construction industry. These statistics help state and local governments and the Federal Government, as well as private industry, to analyze this important sector of the economy. The accuracy of the Census Bureau statistics regarding the amount of construction authorized depends on data supplied by building and zoning officials throughout the country.

The Bureau of the Census uses Form C-411 to obtain information from state and local building permit officials needed for updating the universe of permit-issuing places. The questions pertain to the legal requirements for issuing building or zoning permits in

the local jurisdictions. Information is obtained on such items as geographic coverage and types of construction for which permits are issued.

The universe of permit-issuing places is the sampling frame for the Building Permits Survey (BPS) and the Survey of Construction. These two sample surveys provide widely used measures of construction activity, including the economic indicators, Housing Units Authorized by Building Permits and Housing Starts.

We made the following changes to the form:

a. We deleted two questions:

(1) "What kind of permits does your office issue?" and

(2) "When did your government first begin issuing permits?"

The first question asked for the same information as another question. We no longer need the information requested in the second question.

b. We added two questions:

(1) "If the jurisdiction listed in Section A.1 is a county, does your office issue permits for portions of jurisdictions located in other counties?" and

(2) "If the jurisdiction listed in Section A.1 is a city, town, village, borough or township, is it in more than one county?"

We need the above information to ensure that we update our universe of permit-issuing places correctly for these types of places.

We will request information about permits issued for new residential nonhousekeeping; new nonresidential building; additions, alterations, and conversions; and demolitions and razing of buildings only through a reimbursable agreement. If we do not get that agreement, we will only collect information about permits issued for new residential buildings.

II. Method of Collection

The form is sent to a jurisdiction when the Census Bureau has reason to believe that a new permit system has been established or an existing one has changed, based on information from a variety of sources including survey respondents, regional councils and Census' Geography Division which keeps abreast of changes in corporate status. Responses typically approach 100 percent.
