

services no longer to be offered. SCCP also will charge RIO Accounts the applicable value fees of \$0.05 per \$1,000 of contract value.

SCCP believes the proposed rule change is consistent with the requirements of Section 17A of the Act<sup>11</sup> and the rules and regulations thereunder because the restructuring of SCCP's business as contemplated by the proposed rule change will promote the prompt and accurate clearance and settlement of securities transactions by integrating and consolidating clearing services available to the industry and will assure the safeguarding of securities and funds in the custody or control of SCCP or for which SCCP is responsible.

*(B) Self-Regulatory Organization's Statement on Burden on Competition*

SCCP does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. Securities clearing agencies registered under Section 17A of the Act are not conventional businesses but utilities created to serve members of the securities industry for the purpose of providing certain services that are ancillary to the businesses in which industry members compete with one another. Operating a securities clearing agency requires a substantial and continuing investment in infrastructure including telecommunications links with users, data centers, and disaster recovery facilities in order to meet the increasing needs of participants and respond to regulatory requirements. To date, other exchanges, including the Boston Stock Exchange, the Pacific Exchange, and the Chicago Stock Exchange have substantially terminated the operation of their securities clearing corporations.

After consummation of the proposed arrangements, securities industry members shall continue to have access to high quality, low cost clearing services provided under the mandate of the Act. The overall cost to the industry of having such services available may be reduced thereby permitting a more efficient and productive allocation of industry resources. Furthermore, because most of a clearing corporation's interface costs must be mutualized, thereby requiring some participants to subsidize costs incurred by others, SCCP's withdrawal from maintaining clearing facilities should reduce costs to participants and thereby should remove impediments to competition. Finally, PHLX's ability to focus its resources on the operations of the Exchange should

help enhance competition among securities markets.

*(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others*

Written comments were neither solicited nor received with respect to the proposed rule change.
