[Docket No. 50-423]

Northeast Nuclear Energy Company; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Northeast Nuclear Energy Company (the licensee) to withdraw its April 28, 1997, application for proposed amendment to Facility Operating License No. NPF-49 for the Millstone Nuclear Power Station, Unit 3, located in New London County, Connecticut.

Technical Specification Surveillances 4.1.2.3.1, 4.1.2.4.1, 4.5.2.f, and 4.5.2.h require the charging and safety injection pumps to be tested on a periodic basis and after modifications that alter subsystem flow characteristics. The proposed amendment would have made

changes to these surveillance requirements.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on June 4, 1997 (62 FR 30635). However, by letter dated October 15, 1997, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated April 28, 1997, and the licensee's letter dated October 15, 1997, which withdrew the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Learning Resources Center, Three Rivers Community-Technical College, 574 New London Turnpike, Norwich, Connecticut, and the Waterford Library, ATTN: Vince Juliano, 49 Rope Ferry Road, Waterford, Connecticut.

Dated at Rockville, Maryland, this 23rd day of October 1997.
