Proposed Administrative Order on Consent With Compromise of CERCLA Response and Oversight Costs

AGENCY: U.S. Environmental Protection Agency (USEPA).

ACTION: Proposed AOC.

SUMMARY: U.S. EPA is proposing to sign and issue an Administrative Order on Consent (AOC) under Section 106 of CERCLA for a removal action at the Lake (Petro) Station Superfund Site. Respondents have agreed to perform a full clean up, in return for USEPA waiving response and oversight costs of approximately \$20,000. U.S. EPA Today is proposing to sign and issue this AOC because it achieves a necessary removal action at a Site where there was problematic historical evidence of liability.

DATES: Comments on this proposed settlement must be received by December 15, 1997.

ADDRESSES: Copies of the proposed settlement are available at the following address for review: (It is recommended that you telephone Ms. Noemi Emeric at (312) 886-0995 before visiting the Region V Office). Ms. Noemi Emeric, OPA (P19-J), U.S. Environmental Protection Agency, Region V, Office of Superfund, Removal and Enforcement Response Branch, 77 W. Jackson Blvd., Chicago, Illinois 60604.

Comments on this proposed settlement should be addressed to: (Please submit an original and three copies, if possible) Ms. Noemi Emeric, Community Relations Coordinator, Office of Public Affairs, U.S. Environmental Protection Agency, Region V, 77 W. Jackson Boulevard (P-19J), Chicago, Illinois 60604, (312) 886-0995.

FOR FURTHER INFORMATION CONTACT: Ms. Noemi Emeric, Office of Public Affairs, at (312) 886-0995.

SUPPLEMENTARY INFORMATION: The Lake (Petro) Station Truck Stop Superfund

Site is a 44 acre Truck Stop facility consisting of several buildings and parking lots. The Site is bordered immediately to the north by a creek and a truck stop, to the south by Interstate Highway 94, to the east by an interstate highway exchange, and to the west by Ripley Street. On July 18, 1996, several drums were discovered in the rear of the property by Mr. Jack Danskins, Regional Manager of Welsh Oil, Inc. He observed seven 55-gallon drums, six 30-gallon drums, and sixteen 5-gallon containers. There was spilled material from one of the 5-gallon containers which covered an approximate two-square-foot area. Welsh Oil, Inc., contracted OSI Environmental, Inc., for assistance (stabilization of the materials). After U.S. EPA and the Indian a Department of Environmental Management (IDEM) were contacted, and had sampled and assessed the situation, U.S. EPA contacted the named Respondent parties (due to some of the containers bearing their companies names) and negotiated an Administrative Order on Consent for the remainder of the removal action.

A 30-day period, beginning on the date of publication, is open pursuant to 42 U.S.C. section 122(i) of CERCLA for comments on the proposed settlement.

Comments should be sent to Ms. Noemi Emeric of the Office of Public Affairs (P-19J), U.S. Environmental Protection Agency, Region V, 77 W. Jackson Boulevard, Chicago, Illinois 60604.

Thomas Turner,

Assistant Regional Counsel, United States Environmental Protection Agency.

Final NPDES General Permits for Discharges Resulting From Implementing Corrective Action Plans for Cleanup of Petroleum UST Systems in Texas (TXG830000), Louisiana (LAG830000), Oklahoma (OKG830000) and New Mexico (NMG830000)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final issuance of NPDES general permits.

SUMMARY: EPA Region 6 today issues National Pollutant Discharge Elimination System (NPDES) general permits authorizing discharges resulting from implementing Corrective Action Plans for the cleanup of Petroleum UST Systems in Texas, Louisiana, Oklahoma,

New Mexico and the Pueblos of Santa Clara, San Juan, Pojoaque, Nambe and Picuris. A Petroleum UST System is an underground storage tank system that contains petroleum or a mixture of petroleum with *de minimis* quantities of other regulated substances. Such systems include those containing motor fuels, jet fuels, distillate fuel oils, residual fuel oils, lubricants, petroleum solvents and used oils. The permits place limits on benzene, Total BTEX and pH for all discharges, as well as limits on polynuclear aromatic hydrocarbons (PAH) for discharges from cleanups of Petroleum UST Systems other than gasoline, jet fuel and kerosene. Additional limits include those on lead and Total Petroleum Hydrocarbons in the Texas permit, lead and TOC in the Louisiana permit, Total Organic Carbon and Total Phenols in the Oklahoma permit, and lead, Chemical Oxygen Demand, No Visible Oil Sheen, as well as a biomonitoring requirement, in the New Mexico permit.

DATES: The limits and monitoring requirements in these permits shall become effective December 15, 1997.

FOR FURTHER INFORMATION CONTACT: Ms. Wilma Turner, EPA Region 6 1445 Ross Avenue, Dallas Texas 75202-2733, telephone (214) 665-7516. Copies of the complete response to comments may be obtained from Ms. Turner. The general permits and response to comments may be found on the Internet at <http://www.epa.gov/earth1r6/6wq/6wq.htm>.

SUPPLEMENTARY INFORMATION: Regulated categories and entities include:

Category	Examples of regulated entities
Industry	Operators of facilities discharging waste waters resulting from the cleanup of underground storage tank systems that contain petroleum substances, such as motor fuels, jet fuels and fuel oils.

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be regulated by this action. This table lists the types of entities that EPA is now aware could potentially be regulated by this action. Other types of entities not listed in the table could also be regulated. To determine whether your (facility, company, business, organization, etc.) is regulated by this action, you should carefully examine the applicability criteria in Part I,
