November 12, 1997.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act of 1995, Public Law 104-13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060-0444.

Title: Station Construction/Operational Status Inquiry.

Form No.: FCC 800-A.

Type of Review: Revision of a currently approved collection.

Respondents: Individuals or households; businesses or other for

profit; small businesses or organizations.

Number of Respondents: 11,500.

Estimated Time Per Response: 1 hour.

Frequency of Response: On occasion reporting requirement.

Total Annual Burden: 11,500 hours.

Needs and Uses: The Commission requests this collection of information as a method for licensees to provide information to verify a station has been placed into operation and to notify the Commission of the actual number of mobile units placed in operation after license grant. From this data, the Commission is able to determine full capacity channel loading, making frequencies available for assignment and modifying or cancelling licenses. The data collected ensures licensees are not authorized for more mobiles than they are actually using. The revision is being submitted to clarify the types of uses of the form and frequency of use. We believe that this use is already cleared through OMB but in response to recent public comment, we are submitting this clarification. Except under limited circumstances, certain Part 90 licenses may not be transferred or assigned unless the underlying facility is constructed. This form will also be used to determine compliance with the Commission's construction rules when this information is not available from either a previous submission, manual records, or currently in the licensing database.

Federal Communications Commission.

William F. Caton,

Acting Secretary.
