Acid Rain Program; Notice of Public Workshop on an Emissions Trading Program for Oxides of Nitrogen (NO_x)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public workshops on a NO_x emissions trading program. The second workshop will be held on December 11, from 9 a.m. to 5 p.m., at the Washington National Airport Hilton Hotel.

SUMMARY: EPA recently issued a Notice of Proposed Rulemaking to reduce regional transport of ozone. As part of this rulemaking, EPA is developing a multi-state cap and trade program for large stationary sources. As a way to increase flexibility and maximize cost savings, EPA is offering to administer such a program. States are encouraged to participate in the trading program as a simple and cost-effective strategy for meeting their state-wide emission budget requirements. It is anticipated that a model trading rule will be included in a supplemental document of proposed rulemaking for the transport rule in early 1998 and will be finalized along with the transport rule in September 1998.

In order to provide a forum for input on the framework of a model NO_x cap and trade program, EPA decided to hold two public workshops. The first workshop was held in early November; a variety of comments from States and interested participants were received on the trading program framework. The second workshop will be held on December 11, from 9 a.m. to 5 p.m., at the Washington National Airport Hilton Hotel located at 2399 Jefferson Davis Highway, Arlington Virginia. EPA will use input from these workshops in developing the model trading rule.
