Therefore, because the federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the Clean Air Act, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of state action. The Clean Air Act forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co. v US EPA*, 427 US 246, 256-66 (S.Ct. 1976); 42 U.S.C. 7410(a)(2).

The intention of the GWDR is to reduce microbial contamination risk from public water sources relying on ground water. To determine if treatment is necessary, the rule will establish a framework to identify public water supplies vulnerable to microbial contamination and to develop and implement risk control strategies including but not limited to disinfection. This rulemaking will apply to all public water systems that use ground water, which includes noncommunity systems.
