## NUCLEAR REGULATORY COMMISSION

### Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget (OMB) Review

**AGENCY:** U.S. Nuclear Regulatory Commission (NRC).

**ACTION:** Notice of the OMB review of information collection and solicitation of public comment.

**SUMMARY:** The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

1. Type of submission, new, revision, or extension: Revision.

2. The title of the information collection: 10 CFR 50.55a, "Codes and Standards; Amended Requirements."

3. The form number if applicable: Not applicable.

4. How often the collection is required: The ASME has set a frequency for conducting these activities with its attendant recordkeeping based on operating history and the need for component functionality. The frequency is dependent on the safety function of the component. The information is generally not submitted to the NRC, but is retained by the licensees to be made available to the NRC in the event of an NRC audit. Reporting requirements consist of one-time relief requests or technical specification amendments.

5. Who will be required or asked to report: Nuclear power plant licensees.

6. An estimate of the number of responses: The requirements will apply to licensees and applicants for nuclear power plant licenses. Because no applicants for construction permits or operating licensees are expected, the reports will apply to the 109 nuclear power plants with operating licenses.

7. The estimated number of annual respondents: 109.

8. An estimate of the total number of hours needed annually to complete the requirement or request: Implementation of later Code edition and addenda for ASME Boiler and Pressure Vessel Code (BPV Code) Section XI and OM Code activities is estimated to result in a (1) one-time recordkeeping burden of 48,502 hours (445 hours/plant) and (2) one-time reporting requirements of 328 hours (3 hours/plant) for a total of 18,830 hours. The estimated total annual industry increase in recordkeeping burden is 13,512 hours annually (124 hours/plant). Due to elimination of certain ASME OM Code reporting requirements, the estimated total industry annual reporting burden will decrease by 4,245 hours annually (39 hours/plant).

9. An indication of whether Section 3507(d), Pub. L. 104-13 applies: Applicable.

10. Abstract: The Nuclear Regulatory Commission (NRC) regulations require that nuclear power plant owners (1) construct Class 1, Class 2, and Class 3 components in accordance with the rules provided in Section III, Division 1, "Requirements for Construction of Nuclear Power Plant Components," of the American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code (BPV Code), (2) inspect Class 1, Class 2, Class 3, Class MC (metal containment) and Class CC

(concrete containment) components in accordance with the rules provided in Section XI, Division 1, "Requirements for Inservice Inspection of Nuclear Power Plant Components," of the ASME BPV Code, and (3) test Class 1, Class 2, and Class 3 pumps and valves in accordance with the rules provided in Section XI, Division 1, of the ASME BPV Code. Every 120 months licensees are required to update their inservice inspection (ISI) and inservice testing (IST) programs to meet the version of Section XI incorporated by reference into the regulations in effect 12 months prior to the start of a new 120-month interval.

Submit, by (insert date 30 days after publication in the **Federal Register**), comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?
