

its letter dated September 11, 1997, and the receipt of the request by NRC was noticed in the **Federal Register** on October 6, 1997.

The license amendment modifies License Condition 50 to change completion dates for three site-reclamation milestones. The new dates approved by the NRC extend completion of placement of the interim cover over tailings pile by two years, and completion of placement of the final radon barrier and placement of the erosion protection cover by three years. PMC attributes the delays to a substantial volume of water still remaining to be evaporated from the tailings system, before an interim cover could be placed. Based on the review of PMC's submittal, the NRC staff concludes that the delays are attributable to factors beyond the control of PMC, the proposed work is scheduled to be completed as expeditiously as practicable, and the added risk to the public health and safety is not significant.

An environmental assessment is not required since this action is categorically excluded under 10 CFR 51.22(c)(11), and an environmental

report from the licensee is not required by 10 CFR 51.60(b)(2).

SUPPLEMENTARY INFORMATION: PMC's amended license, and the NRC staff's technical evaluation of the amendment request are being made available for public inspection at the Commission's Public Document Room at 2120 L Street, NW. (Lower Level), Washington, DC 20555.
