POLICY JUSTIFICATIONSingapore - F-16C/D Aircraft Support with M61A1 Guns

The Government of Singapore has requested a possible sale of services and support for F-16C/D aircraft, 12 M61A1 20mm guns, modification kits, maintenance, flight training, spare and repair parts, support equipment, program management, publications and documentation, personnel training and training equipment, logistics personnel services and other related elements of program support. The estimated cost is \$287 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country which has been and continues to be an important force for economic progress in Southeast Asia.

This proposed sale will support Singapore's current and future F-16 aircraft inventory. The training portion is for a long term pilot training program in CONUS. Singapore will have no difficulty absorbing this support into its armed forces.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

There are no offset agreements proposed to be entered into in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government personnel or contractor representatives to Singapore.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
