

When inspection of regulated articles or outdoor household articles reveals gypsy moth, treatment is often necessary. Treatment is done by qualified certified applicators, which are private businesses that charge, on the average, \$50 to \$100 to treat a shipment of articles. Most qualified certified applicators are small businesses. By declaring an area as a generally infested area, the regulations may increase business for qualified certified applicators located in generally infested areas. It is estimated that these businesses will average \$50 to \$150 per month in additional income per business. A few of the newly quarantined counties contain large urban areas that may have several hundred shipments annually containing outdoor household articles that will require inspection to move interstate from the generally infested area. Thus, there will likely be a need to train additional qualified certified applicators in those areas.

Entities in the newly quarantined areas that will incur the most costs from the interim rules will be establishments moving trees or shrubs with roots, such as nurseries. We estimate that approximately 60 such establishments move approximately 165 shipments of trees and shrubs each year from the newly quarantined areas. All of these establishments are believed to be small entities. These establishments will need to be inspected, either by an inspector or through self-inspection under a compliance agreement. If the inspection reveals signs of gypsy moth, the establishment will have to be treated in order to ship regulated articles outside the generally infested area. We estimate that annually, approximately 5 of these establishments will require treatment, and that the average area to be treated will be 20 acres. At an average treatment cost of \$10 to \$20 per acre, the average total annual cost to each establishment would be \$200 to \$400.

The Christmas tree industry and establishments that sell other forest products and that move their products interstate will also bear direct costs from the interim rules. There are approximately 689 farms that sell forest products and Christmas trees in the newly quarantined areas. These account for 9.4 percent of the total number of such farms in Ohio, Virginia, West Virginia, and Wisconsin. All of these establishments are believed to be small entities. Services of an inspector will be available without charge to inspect these farms and issue certificates and permits. We estimate that less than four percent of all these farms will be found to contain gypsy moth and, therefore,

require treatment in order to ship trees. It is expected that, in most cases, Christmas tree farms will be free of gypsy moth and Christmas tree growers will meet the requirements for certification by having inspectors certify that the tree farms are free from gypsy moth. This alternative is less costly than inspecting or treating each individual shipment of trees and will thus minimize the economic impact of the change to the regulations for the newly quarantined areas.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 7 CFR Part 301

Agricultural commodities, Incorporation by reference, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements, Transportation.

PART 301—DOMESTIC QUARANTINE NOTICES

Accordingly, we are adopting as a final rule, without change, two interim rules that amended 7 CFR part 301 and that were published at 62 FR 29286–29287 on May 30, 1997, and 62 FR 36645–36646 on July 9, 1997.

Authority: 7 U.S.C. 147a, 150bb, 150dd, 150ee, 150ff, 161, 162, and 164–167; 7 CFR 2.22, 2.80, and 371.2(c).

Done in Washington, DC, this 26th day of November 1997.

Craig A. Reed,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Part 78

[Docket No. 97–108–1]

Brucellosis in Cattle; State and Area Classifications; Arkansas

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule and request for comments.

SUMMARY: We are amending the brucellosis regulations concerning the interstate movement of cattle by changing the classification of Arkansas from Class A to Class Free. We have determined that Arkansas meets the

standards for Class Free status. This action relieves certain restrictions on the interstate movement of cattle from Arkansas.

DATES: Interim rule effective on December 3, 1997. Consideration will be given only to comments received on or before February 2, 1998.

ADDRESSES: Please send an original and three copies of your comments to Docket No. 97–108–1, Regulatory Analysis and Development, PPD, APHIS, Suite 3C03, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comments refer to Docket No. 97–108–1. Comments received may be inspected at USDA, room 1141, South Building, 14th Street and Independence Avenue, SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect comments are requested to call ahead on (202) 690–2817 to facilitate entry into the comment reading room.

FOR FURTHER INFORMATION CONTACT: Dr. R.T. Rollo, Jr., Staff Veterinarian, National Animal Health Programs, VS, APHIS, Suite 3B08, 4700 River Road Unit 36, Riverdale, MD 20737–1231, (301) 734–7709; or e-mail: rrollo@aphis.usda.gov.

SUPPLEMENTARY INFORMATION:

Background

Brucellosis is a contagious disease affecting animals and humans, caused by bacteria of the genus *Brucella*.

The brucellosis regulations, contained in 9 CFR part 78 (referred to below as the regulations), provide a system for classifying States or portions of States according to the rate of *Brucella* infection present, and the general effectiveness of a brucellosis control and eradication program. The classifications are Class Free, Class A, Class B, and Class C. States or areas that do not meet the minimum standards for Class C are required to be placed under Federal quarantine.

The brucellosis Class Free classification is based on a finding of no known brucellosis in cattle for the 12 months preceding classification as Class Free. The Class C classification is for States or areas with the highest rate of brucellosis. Class B and Class A fall between these two extremes. Restrictions on moving cattle interstate become less stringent as a State approaches or achieves Class Free status.

The standards for the different classifications of States or areas entail (1) maintaining a cattle herd infection rate not to exceed a stated level during

12 consecutive months; (2) tracing back to the farm of origin and successfully closing a stated percent of all brucellosis reactors found in the course of Market Cattle Identification (MCI) testing; (3) maintaining a surveillance system that includes testing of dairy herds, participation of all recognized slaughtering establishments in the MCI program, identification and monitoring of herds at high risk of infection (including herds adjacent to infected herds and herds from which infected animals have been sold or received), and having an individual herd plan in effect within a stated number of days after the herd owner is notified of the finding of brucellosis in a herd he or she owns; and (4) maintaining minimum procedural standards for administering the program.

Before the effective date of this interim rule, Arkansas was classified as a Class A State.

To attain and maintain Class Free status, a State or area must (1) remain free from field strain *Brucella abortus* infection for 12 consecutive months or longer; (2) trace back at least 90 percent of all brucellosis reactors found in the course of MCI testing to the farm of origin; (3) successfully close at least 95 percent of the MCI reactor cases traced to the farm of origin during the 12 consecutive month period immediately prior to the most recent anniversary of the date the State or area was classified Class Free; and (4) have a specified surveillance system, as described above, including an approved individual herd plan in effect within 15 days of locating the source herd or recipient herd.

After reviewing the brucellosis program records for Arkansas, we have concluded that this State meets the standards for Class Free status. Therefore, we are removing Arkansas from the list of Class A States in § 78.41(b) and adding it to the list of Class Free States in § 78.41(a). This action relieves certain restrictions on moving cattle interstate from Arkansas.

Immediate Action

The Administrator of the Animal and Plant Health Inspection Service has determined that there is good cause for publishing this interim rule without prior opportunity for public comment. Immediate action is warranted to remove unnecessary restrictions on the interstate movement of cattle from Arkansas.

Because prior notice and other public procedures with respect to this action are impracticable and contrary to the public interest under these conditions, we find good cause under 5 U.S.C. 553 to make it effective on December 3,

1997. We will consider comments that are received within 60 days of publication of this rule in the **Federal Register**. After the comment period closes, we will publish another document in the **Federal Register**. It will include a discussion of any comments we receive and any amendments we are making to the rule as a result of the comments.

Executive Order 12866 and Regulatory Flexibility Act

This rule has been reviewed under Executive Order 12866. For this action, the Office of Management and Budget has waived its review process required by Executive Order 12866.

Cattle moved interstate are moved for slaughter, for use as breeding stock, or for feeding. Changing the brucellosis status of Arkansas from Class A to Class Free will promote economic growth by reducing certain testing and other requirements governing the interstate movement of cattle from this State. Testing requirements for cattle moved interstate for immediate slaughter or to quarantined feedlots are not affected by this change. Cattle from certified brucellosis-free herds moving interstate are not affected by this change.

The groups affected by this action will be herd owners in Arkansas, as well as buyers and importers of cattle from this State.

There are an estimated 32,553 cattle herds in Arkansas that would be affected by this rule. All of these are owned by small entities. Test-eligible cattle offered for sale interstate from other than certified-free herds must have a negative test under present Class A status regulations, but not under regulations concerning Class Free status. If such testing were distributed equally among all animals affected by this rule, Class Free status would save approximately \$3 per head.

Therefore, we believe that changing the brucellosis status of Arkansas will not have a significant economic impact on the small entities affected by this interim rule.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

Executive Order 12988

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule: (1) Preempts all State and local laws and regulations that are in conflict with this rule; (2) has no retroactive effect; and (3) does not require administrative proceedings before parties may file suit in court challenging this rule.

Paperwork Reduction Act

This document contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

List of Subjects in 9 CFR Part 78

Animal diseases, Bison, Cattle, Hogs, Quarantine, Reporting and recordkeeping requirements, Transportation.

Accordingly, 9 CFR part 78 is amended as follows:

PART 78—BRUCELLOSIS

1. The authority citation for part 78 continues to read as follows:

Authority: 21 U.S.C. 111–114a–1, 114g, 115, 117, 120, 121, 123–126, 134b, and 134f; 7 CFR 2.22, 2.80, and 371.2(d).

§ 78.41 [Amended]

2. In § 78.41, paragraph (a) is amended by adding “Arkansas,” immediately after “Arizona,” and paragraph (b) is amended by removing “Arkansas,”.

Done in Washington, DC, this 26th day of November 1997.

Craig A. Reed,

Acting Administrator, Animal and Plant Health Inspection Service.
