Not only would the disclosure of such data implicate proscriptions set forth in the Federal Acquisition Regulations, but also such disclosure would significantly frustrate a proposed agency action. Specifically, disclosure of the Subcommittee's discussion prematurely, including contract specifications and government cost estimates, could affect private decisions made by the contractor which might damage the financial interests of the government as a whole, by, for example, increasing the costs to the government, and might make it impossible for the two sides to reach agreement. A summary of the activities of this closed meeting and other related matters, which are informative to the public and consistent with the policy of the Section 5 U.S.C. 552b, will be available to the public within 14 days after the meeting. State Energy Program Special Projects Financial Assistance

AGENCY: The Department of Energy.

ACTION: Notice for 1998 State Energy Program special projects.

SUMMARY: As options offered under the State Energy Program (SEP) for fiscal year 1998, the Office of Energy Efficiency and Renewable Energy is announcing the availability of financial assistance to States for a group of special project activities. Funding is being provided by a number of end-use sector programs in the Office of Energy Efficiency and Renewable Energy. States may apply to undertake any of the projects being offered by these programs. States that are awarded funding for special projects will carry out their projects in conjunction with their efforts under SEP, with the special

projects funding and activities tracked separately so that the end-use sector programs may follow the progress of their projects.

The projects must meet the relevant requirements of the programs providing the funding, as well as of SEP, as specified in the program guidance/solicitation. Among the goals of the special projects activities are to assist States to: Accelerate deployment of energy efficiency and renewable energy technologies; facilitate the acceptance of emerging and underutilized energy efficiency and renewable energy technologies; and increase the responsiveness of Federally funded technology development efforts to private sector needs.

DATES: The program guidance/solicitation is expected to be December 5, 1997. Applications must be received by February 14, 1998.

Evaluation Review and Criteria

A first tier review for completeness will occur at the appropriate DOE Regional Support Office. Applications found to be complete will undergo a merit review process by panels comprised of members representing the respective participating end-use sector programs in DOE's Office of Energy Efficiency and Renewable Energy. A decision as to the applications selected for funding will then be made by the Deputy Assistant Secretary for Building Technology, State and Community Programs, or designee, based on the findings of the technical merit review and any stated program policy factors.
