

significant change in the types or significant increase in the amounts of any effluents that may be released offsite.

2. The proposed amendment will not result in a significant increase in individual or cumulative occupational radiation exposure.

For the reasons provided in the assessment of criterion 1, the proposed amendment will not significantly increase the risk of a UF6 release. Therefore, having a single pressure switch in the ALRI set at +0.5 psig, as opposed to having redundant pressure switches, will not result in a significant increase in individual or cumulative occupational radiation exposures.

3. The proposed amendment will not result in a significant construction impact.

The proposed amendment does not involve any construction, therefore, there will be no construction impacts.

4. The proposed amendment will not result in a significant increase in the potential for, or radiological or chemical consequences from, previously analyzed accidents.

For the reasons provided in the assessment of criterion 1, the proposed amendment will not significantly increase the risk of a release of UF6 or of the products of its reaction with steam. Therefore, having a single pressure switch in the ALRI set at +0.5 psig, as opposed to having redundant pressure switches, will not result in a significant increase in the potential for, or radiological or chemical consequences from, previously analyzed accidents.

5. The proposed amendment will not result in the possibility of a new or different kind of accident.

Based on the staff's review of the proposed amendment, no new or different accidents were identified.

6. The proposed amendment will not result in a significant reduction in any margin of safety.

For the reasons provided in the assessment of criterion 1, the proposed amendment will not significantly increase the risk of a release of UF6 or of the products of its reaction with steam. Based on the staff's review of the proposed amendment, the staff concludes that there will be no significant reduction of any margin of safety.

7. The proposed amendment will not result in an overall decrease in the effectiveness of the plant's safety, safeguards, or security programs.

For similar reasons provided in the assessment of criterion 1, the proposed amendment will not significantly increase the risk of a release of UF6 or

of the products of its reaction with steam. In addition, the staff has not identified any criticality related implications from the proposed amendment. Based on the staff's review of the proposed amendment, the staff concludes that there will be no decrease in the effectiveness of the overall plant's safety program.

The staff has not identified any safeguards or security related implications from the proposed amendment. Therefore, the proposed amendment will not result in an overall decrease in the effectiveness of the plant's safeguards or security programs.

Effective date: The amendment to GDP-2 will become effective 5 days after issuance by NRC.

Certificate of Compliance No. GDP-2: The amendment will revise the Compliance Plan and the SAR.
