### Federal Highway Administration

#### Environmental Impact Statement: Traverse City, Michigan

**AGENCY:** Federal Highway Administration (FHWA), DOT.

**ACTION:** Notice of intent.

**SUMMARY:** The FHWA is issuing this notice to advise the public that an Environmental Impact Statement will be prepared for the proposed construction of a new Boardman River crossing with a connection between US-31 south of Traverse City and US-31 east of Traverse City, Grand Traverse County, Michigan. The project will provide an alternate route around Traverse City which may function as a local, interim by-pass for Traverse City. The proposed project will mostly follow existing roadways in the Traverse City area.

**FOR FURTHER INFORMATION CONTACT:** Mr. James Kirschensteiner, Environmental Programs and Field Operations Engineer, Federal Highway Administration, 315 W. Allegan Street, Lansing, Michigan 48933, Telephone (517) 377-1880 or Mr. Mark Dionise, Urban Program Manager, Local Agency Programs, Bureau of Highways, Michigan Department of Transportation, P.O. Box 30050, Lansing, Michigan 48909, Telephone (517) 373-9570.

**SUPPLEMENTARY INFORMATION:** The FHWA in cooperation with the Michigan Department of Transportation (MDOT), and the Grand Traverse County Road Commission, is preparing an Environmental Impact Statement (EIS) for the proposed construction of a new Boardman River crossing with a connection between US-31 south of Traverse City and US-31 east of Traverse City, Michigan. The proposed project will replace the existing one-lane Cass Road Bridge over the Boardman River with a new bridge with connections to US-31 both south of and east of Traverse City. The completion of this project will provide an alternate route around Traverse City and will relieve congestion on US-31 through downtown Traverse City. The existing Cass Road Bridge will remain in place, but will be closed to traffic upon completion of the project.

The alternatives under consideration include (1) No Build, (2) the reconstruction and connection of Hartman and Hammond Roads along with the study of a suitable connection to US-31 east of Traverse City, and (3) Transportation System Management (TSM) improvements to existing roads in the study area to relieve congestion.

An Environmental Assessment had been prepared for the replacement of the Cass Road Bridge which is located on the Boardman River dam. The Cass Road Bridge and Boardman dam complex has been determined to be eligible for the National Register of Historic Places. The Environmental Assessment analyzed the social, environmental, and economic impacts of various alternative locations for replacement of the Cass Road Bridge. A preferred alternative for a new bridge across the Boardman River, connecting Hartman Road with Hammond Road, upgrading Hartman Road from two lanes to four and five lanes with a new intersection location at U-31, upgrading Hammond Road from two lanes to four and five lanes, and closing the existing Cass Road Bridge was presented at a public hearing on June 24, 1997. As a result of the public hearing, it was determined to revise the scope of the proposed project to include alternatives to connect this project with US-31 east of Traverse City and to prepare an Environmental Impact Statement on this proposed action. A scoping document will be prepared describing the proposed action to solicit comments from appropriate Federal, State, and local agencies. Citizen involvement is also being solicited in the process. A public hearing will be held on the Draft Environmental Impact Statement. Public notice will be given of the time and place of the hearing. The Draft EIS will be available for public and agency review and comment prior to the public hearing.

Comments, and suggestions are invited from all interested parties to ensure that the full range of issues related to this proposed action are addressed and all significant issues identified. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.
