

(Specific quantities of water from the VAMP Agreement and from willing sellers are currently under negotiation and will be identified in the EIS/EIR.)

Issues or resources that may be affected by the proposed project that will be evaluated in the EIS/EIR are the following: surface water, groundwater, biological resources (vegetation, wildlife, fisheries), land use (including agriculture), recreation, cultural resources, and environmental justice. Impacts to other resources would be evaluated if public scoping determines the need for such an evaluation. Cumulative impacts and other short-term and long-term impacts required by CEQA and NEPA will be evaluated as well.

The Draft EIS/EIR will analyze a range of alternatives that include, but are not limited to, the no-action alternative and other flow regimes in support of VAMP and related San Joaquin River flows under Section 3406(b)(3). The impact analysis may include combinations of one or more alternatives as well as other alternatives identified during the public scoping process. Alternatives to the proposed project have not yet been identified and will depend upon the results of public scoping. Alternatives to be evaluated in depth in the EIS/EIR need to be consistent with the project purpose described above.

Dated: December 2, 1997.

Kirk C. Rodgers,

Deputy Regional Director.
