

with establishing the requested exemption from the requirement of a tolerance follows.

Phospholipid is present in all cells in all organisms. It is part of the cell membranes. Lyso-PE (a specific phospholipid) is present in high quantities in food products containing egg yolk and meat. In dried egg yolk, the Lyso-PE constitutes 2% of the fat present. Egg solids are widely used in food products. In the USA, about 18 billion eggs are broken per year to produce egg white and egg solids. Because of this all acute toxicity, genotoxicity, and subchronic toxicity studies normally required for biochemical pesticides are waived.

D. Aggregate Exposure

Phospholipid is present in all cells in all organisms. It is a part of the cell membrane. Phospholipid is present in high quantities in food products containing egg yolk and meat.

1. *Dietary exposure—food.* It is anticipated that residues of phospholipid will be negligible in treated raw agricultural commodities. Due to the products lack of mammalian toxicity, any exposure if it occurred will not be harmful to humans. It is not anticipated that residues of phospholipid will occur in drinking water.

2. *Non-dietary exposure, non-occupational exposure.* Increased non-dietary exposure of phospholipid via lawn care, topical insect repellents, etc., is not applicable to this EUP application.

E. Cumulative Exposure

There is no anticipated potential for cumulative effects of phospholipid since it does not have a mode of toxicity.

F. Endocrine Disruptors

J P Bioregulators Inc., has no information to suggest that phospholipid will adversely affect the immune or endocrine systems.

G. Safety Considerations

The lack of toxicity of phospholipid is demonstrated by the above summary. Based on this information, the aggregate exposure to phospholipid over a lifetime should not pose appreciable risks to human health. There is a reasonable certainty that no harm will result from aggregate exposure to phospholipid residues. Exempting phospholipid from the requirement of a temporary tolerance should be considered safe and pose insignificant risk.

Egg solids are widely used in food products. In dried egg yolk, 2% of the lipids are Lyso-PE. Egg yolks are used in a variety of foods including baby food and infant formula. Lyso-PE is also present in human breast milk. There is a reasonable certainty that no harm will result to infants and children from aggregate exposure to phospholipid residues.

H. Analytical method

An analytical method for residues is not applicable as this proposes an exemption from the requirement of a tolerance.

I. Existing Tolerances

No tolerances or exemptions from the requirement of tolerance have been established or applied for domestically or internationally other than subject petition.

BILLING CODE 6560-50-F

FEDERAL EMERGENCY MANAGEMENT AGENCY

Open Meeting, Technical Mapping Advisory Council

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice of meeting.

SUMMARY: In accordance with section 10(a)(2) of the Federal Advisory Committee Act, 5 App. 1, the Federal Emergency Management Agency gives notice that the following meeting will be held:

NAME: Technical Mapping Advisory Council.

DATES OF MEETING: December 11 and 12, 1997.

PLACES: The meeting will be held at the Thunderbird Motel, 2201 E. 78th St., Bloomington, MN.

TIMES: 8 a.m. to 6 p.m. on Thursday and 8 a.m. to 4 p.m. on Friday.

PROPOSED AGENDA: Discussion of 1997 Annual Report.

STATUS: This meeting is open to the public.

FOR FURTHER INFORMATION CONTACT: Michael K. Buckley, P.E., Federal Emergency Management Agency, 500 C Street SW., room 421, Washington, DC 20472; telephone (202) 646-2756 or by fax (202) 646-4596.

SUPPLEMENTARY INFORMATION: Publication of this notice does not give a 15 day advance notice of the meeting as required by General Services Administration regulations. This shorter

notice period resulted from reassignment of Agency staff.

Dated: December 8, 1997.

Michael J. Armstrong,

Associate Director for Mitigation.

BILLING CODE 6718-04-M

FEDERAL MARITIME COMMISSION

Ocean Freight Forwarder License; Revocations

The Federal Maritime Commission hereby gives notice that the following freight forwarder licenses have been revoked pursuant to section 19 of the Shipping Act of 1984 (46 U.S.C. app. 1718) and the regulations of the Commission pertaining to the licensing of ocean freight forwarders, effective on the corresponding revocation dates shown below:

License Number: 208.

Name: Albert M. Ruiz, d/b/a York International Co.

Address: 33 West 46th street, Room 902, New York, NY 10036

Date Revoked: August 21, 1997.

Reason: Failed to maintain a valid surety bond.

License Number: 3895.

Name: Cargo Services International, Inc.

Address: 5190 N.W. 167th Street, Miami, FL 33014

Date Revoked: October 7, 1997.

Reason: Failed to maintain a valid surety bond.

License Number: 1096.

Name: Foreign Forwarding, Inc.

Address: 10300 West Hampton Avenue, Milwaukee, WI 53225-4099

Date Revoked: September 8, 1997.

Reason: Surrendered license voluntarily.

License Number: 1468.

Name: Metro Worldwide Shipping Inc.

Address: 147-20 181st Street, Jamaica, NY 11413

Date Revoked: August 29, 1997.

Reason: Surrendered license voluntarily.

License Number: 3449.

Name: The Echlin Sales Company

Address: 100 Double Beach Road, Branford, CT 06405

Date Revoked: September 9, 1997.

Reason: Surrendered license voluntarily.

Bryant L. VanBrakel,

Director, Bureau of Tariffs, Certification and Licensing.
