**21 CFR Part 558**

**New Animal Drugs For Use In Animal Feeds; Semduramicin and Roxarsone**

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Final rule.

**SUMMARY:** The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Pfizer, Inc. The NADA provides for using approved single ingredient Type A medicated articles to make combination drug Type C medicated broiler chicken feeds containing semduramicin and roxarsone used for prevention of coccidiosis.

**EFFECTIVE DATE:** December 23, 1997.

**FOR FURTHER INFORMATION CONTACT:** Estella Z. Jones, Center for Veterinary

Medicine (HFV-135), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301-594-1643.

**SUPPLEMENTARY INFORMATION:** Pfizer, Inc., 235 East 42d St., New York, NY 10017, filed NADA 141-066, which provides for combining approved Type A medicated articles containing Aviax™ (semduramicin sodium) (22.7 grams per pound (g/lb.)) and 3-Nitro (roxarsone) (45.4, 90, and 227 g/lb.) to make combination drug Type C medicated broiler chicken feeds containing 22.7 grams per ton of semduramicin and 45.4 grams per ton of roxarsone. The Type C medicated feed is used for the prevention of coccidiosis caused by *Eimeria acervulina*, *E. brunetti*, *E. maxima*, *E. mivati*/*E. mitis*, *E. necatrix*, and *E. tenella* including some field strains of *E. tenella* that are more susceptible to semduramicin combined with roxarsone than semduramicin alone. The NADA is approved as of December 23, 1997, and the regulations are amended by adding 21 CFR 558.555(b)(4) to reflect the approval. The basis for approval is discussed in the freedom of information summary.

In accordance with the freedom of information provisions of 21 CFR part 20 and 514.11(e)(2)(ii), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA-305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1-23, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday.

Under section 512(c)(2)(F)(ii) of the Federal Food, Drug, and Cosmetic Act the act (21 U.S.C. 360b(c)(2)(F)(ii)), this approval for food-producing animals qualifies for 3 years marketing exclusivity beginning December 23, 1997, because the application contains substantial evidence of the effectiveness of the drug involved, any studies of animal safety or, in the case of food-producing animals, human food safety studies (other than bioequivalence or residue studies) required for approval and conducted or sponsored by the applicant.

This approval is for use of approved Type A medicated articles to make combination drug Type C medicated feeds. One ingredient, roxarsone, is a Category II drug as defined in 21 CFR 558.3 (b)(1)(ii). As provided in 21 CFR 558.4(b), an approved FDA form 1900 is required for making a Type B or Type C medicated feed as in this application. Under section 512(m) of the act, as amended by the Animal Drug

Availability Act of 1996 (Pub L. 104-250), medicated feed applications have been replaced by a requirement for feed mill licenses. Therefore, use of semduramicin and roxarsone Type A medicated articles to make Type C medicated feeds as provided in NADA 141-066 requires a feed mill license rather than an approved FDA Form 1900.

The agency has determined under 21 CFR 25.33(a)(1) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.
