

Accident Analysis section of the PORTS Safety Analysis Report (SAR). Based on an initial review of the amendment request, the NRC staff feels that sufficiently adequate safety controls are currently in place at PORTS to prevent and mitigate this accident. Therefore, other than the proposed modification to the PORTS SAR, this amendment would likely not require any other changes to plant operations.

Certificate of Compliance No. GDP-2: Amendment will revise the Accident Analysis section of the SAR.

Draft Regulatory Guide; Issuance, Availability

The Nuclear Regulatory Commission has issued for public comment a proposed revision of a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the Commission's regulations, techniques used by the staff in evaluating specific problems or postulated accidents, and data needed by the staff in its review of applications for permits and licenses.

The draft guide, temporarily identified by its task number, DG-5008 (which should be mentioned in all correspondence concerning this draft guide), is a proposed Revision 2 to Regulatory Guide 5.62, "Reporting of Safeguards Events." The guide is in Division 5, "Materials and Plant Protection." This proposed revision is being developed to provide updated guidance for use by licensees in determining when and how safeguards events should be reported.

The draft guide has not received complete staff review and does not represent an official NRC staff position.

Public comments are being solicited on Draft Regulatory Guide DG-5008. Comments may be accompanied by additional relevant information or supporting data. Written comments may be submitted to the Rules and Directives Branch, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555.
