#### Proposed Projects

1. The National Home and Hospice Care Survey (NHHCS)—(0920-0298)—Revision—The National Home and Hospice Care Survey (NHHCS) was conducted in 1992, 1993, 1994, 1996, and 1997. It is part of the Long-Term Care component of the National Health Care Survey. Section 306 of the Public Health Service Act states that the National Center for Health Statistics "shall collect statistics on health resources \* \* \* [and] utilization of health care, including utilization of \* \* \* services of hospitals, extended care facilities, home health agencies, and other institutions." NHHCS data are used to examine this most rapidly expanding sector of the health care industry. The NHHCS also reveals detailed information on utilization patterns, as needed to make accurate assessments of the need for and costs associated with such care. Data from earlier NHHCS collections have been used by the Congressional Budget Office, the Bureau of Health Professions, the Maryland Health Resources Planning Commission, the National Association for Home Care, and by several newspapers and journals. Additional uses are expected to be similar to the uses of the National Nursing Home Survey. NHHCS data cover: baseline data on the characteristics of hospices and home health agencies in relation to their
