BILLING CODE 4160-01-F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 96N-0391]

Micronutrient Requirements for Preterm Infant Formulas; Announcement of Study; Request for Scientific Data and Information; Announcement of Open Meeting

AGENCY: Food and Drug Administration,
 HHS.

ACTION: Notice.

SUMMARY: The Food and Drug
 Administration (FDA) is announcing
 that the Life Sciences Research Office
 (LSRO) of the American Society of

Nutritional Sciences (ASNS) is
 undertaking an assessment of the
 scientific basis for the need to establish
 specific recommendations (minimum
 and maximum levels) for intake by
 preterm infants of micronutrients, that
 is, the vitamins and minerals specified
 in the Federal Food, Drug, and Cosmetic
 Act (the act) and selenium,
 molybdenum, chromium, and fluoride.
 To assist in this task, LSRO/ASNS is
 inviting the submission of scientific
 data and information on this topic and
 will provide an opportunity for oral
 presentations at an open meeting.

DATES: The LSRO will hold a 1-day
 public meeting on this topic on Friday,
 March 27, 1998. The meeting will begin
 at 9 a.m. Requests to make oral
 presentations at the open meeting must
 be submitted in writing and received by
 Friday, February 13, 1998. Hard copies
 of oral presentations should be
 delivered by Friday, March 20, 1998.
 Individuals may submit, in writing,
 scientific data, information, and views
 by July 1, 1998.

ADDRESSES: The open meeting will be
 held in the Chen Auditorium, Lee Bldg.,
 American Society of Nutritional
 Sciences, 9650 Rockville Pike, Bethesda,
 MD. Written requests to make oral
 presentations of scientific data,
 information, and views at the open
 meeting should be submitted both to
 Daniel J. Raiten (address below) and to
 the Dockets Management Branch (HFA-
 305), Food and Drug Administration,
 12420 Parklawn Dr., rm. 1-23,
 Rockville, MD 20857. Two copies of the
 scientific data, information, and views
 should be submitted to each office.
 These two copies are to be identified
 with the docket number found in
 brackets in the heading of this
 document.

FOR FURTHER INFORMATION CONTACT:

Daniel J. Raiten, Life Sciences
 Research Office, Federation of
 American Societies for
 Experimental Biology, 9650
 Rockville Pike, Bethesda, MD
 20814-3998, 301-530-7030, or
 Linda H. Tonucci, Center for Food
 Safety and Applied Nutrition (HFS-
 456), Food and Drug
 Administration, 200 C St. SW.,
 Washington, DC 20204, 202-205-
 5372.

SUPPLEMENTARY INFORMATION: FDA has a
 contract (223-92-2185) with ASNS
 concerning the analysis of scientific
 issues that bear on the safety of foods
 and cosmetics. The objectives of this
 contract are to provide information to
 FDA on general and specific issues of
 scientific fact associated with the
 analysis of human nutrition.

Infant formulas for use by infants with
 low birth-weight are subject to
 regulation under 412(h) of the act (21
 U.S.C. 350a(h)). Exempt infant formulas
 are permitted to have nutrients or
 nutrient levels that are different from
 those that are codified in 21 CFR
 107.100, if the manufacturer of the
 infant formula can justify the nutrient
 deviation. The agency believes that
 some deviations from the nutrient
 requirements established for term
 infants may be appropriate to promote
 healthy growth and development in low
 birth-weight preterm infants. These
 deviations have yet to be defined.
 Consequently, FDA has asked ASNS to
 perform a review to consider whether
 there is a scientific basis for having
 different recommendations for
 micronutrients in formulas for low
 birth-weight preterm infants.

FDA is announcing that it has asked
 ASNS, as a task under contract 223-92-
 2185, to provide FDA's Center for Food
 Safety and Applied Nutrition with an
 up-to-date review of the nutrient
 requirements of low birth-weight
 preterm infants, including a review of
 the implications of these requirements
 on the need for recommendations for
 levels of nutrients in formulas for these
 infants. In response to this request,
 ASNS has directed its LSRO to obtain
 state-of-the-art scientific information on
 low birth-weight preterm infant nutrient
 requirements and related scientific
 questions on specifications for preterm
 infant formula. The LSRO/ASNS will
 undertake a study and prepare a
 documented scientific report that
 summarizes the available information
 related to these issues.

LSRO/ASNS will perform an
 assessment of the nutrient requirements
 for infant formulas intended for use by
 preterm (low birth-weight) infants that
 addresses the following issues:

(1) What scientific basis is there to
 specify requirements for micronutrients
 in infant formulas intended for use by
 low birth-weight preterm infants? The
 American Academy of Pediatrics, the
 European Society for Pediatric
 Gastroenterology and Nutrition, and the
 Canadian Pediatric Society have
 proposed nutrient requirements for low
 birth-weight infants distinct from those
 for term infants. Has scientific
 knowledge advanced to the point to
 warrant distinct micronutrient
 composition standards for formulas for
 low birth-weight preterm infants?

(2) Micronutrient requirements of
 preterm infants fed enteral formulas are
 sometimes described according to a first
 or transition stage (between birth and 10
 days of age), a stable growing stage
 (from about 10 days until discharge

from the hospital, often 6 to 8 weeks after birth), and a postdischarge stage (from discharge home to approximately 1 year). Is there scientific evidence to support more than one set of micronutrient requirements for infant formulas to support healthy growth and development of the preterm infant at the different stages of development? Are the micronutrient requirements for term infant formulas sufficient for thriving postdischarge preterm infants?

(3) What is the scientific evidence to support a dietary recommendation for a minimum and a maximum quantitative nutrient concentration for selenium, chromium, molybdenum, and fluoride in preterm infant formulas? What limits of intake would ensure safe and adequate exposure to these nutrients? Is there a need to specify the chemical form or other characteristics of these nutrients or their sources to ensure safety and adequacy?

(4) Certain micronutrient interactions, such as vitamin E:linoleic acid, vitamin B6:protein, and calcium:phosphorus, have been identified for full-term infants which have helped to ensure the adequacy of full-term formulas. Are there micronutrient interactions that can be identified for preterm infants that will help to ensure the nutrient adequacy of infant formulas for this population? Are there recommended ratios for metal cations? Is the evidence of interaction between these minerals sufficiently strong to suggest that the ratios should be ensured for the health of preterm infants?

(5) In an earlier task under this contract (61 FR 58566, November 15, 1996), LSRO/ASNS agreed to investigate whether there is evidence of a benefit to preterm infants from ingestion of taurine and carnitine, as well as whether there is evidence that would provide a basis for a requirement for minimal intakes of each of these substances. Is there adequate evidence of benefit of other substances not listed in this notice to support a requirement for their inclusion in preterm infant formulas?

LSRO/ASNS will use these questions as a guide in its investigation. ASNS will prepare a comprehensive final report that documents and summarizes the results of its evaluation.

FDA and ASNS are announcing that the LSRO/ASNS expects to hold a public meeting on this topic on Friday, March 27, 1998. The meeting will begin at 9 a.m. It is anticipated that the public meeting will be up to 1 day, depending on the number of requests to make oral presentations. Requests to make oral presentations at the open meeting must be submitted in writing and received by

Friday, February 13, 1998. Written requests to make oral presentations of scientific data, information, and views at the open meeting should be submitted both to Daniel J. Raiten (address above) and to the Dockets Management Branch (address above). Two copies of the material to be presented must be submitted to each office on or before March 20, 1998. The open meeting will be held in the Chen Auditorium, Lee Bldg., ASNS (address above).

FDA and ASNS are also inviting submission of written presentations of scientific data, information, and views. These materials should be submitted on or before July 1, 1998. Two copies of the written materials must be submitted to each office.

In accordance with its contract with FDA, ASNS will provide the agency with a scientific report on or about September 30, 1998.

Dated: January 6, 1998.

William K. Hubbard,
Associate Commissioner for Policy
Coordination.

BILLING CODE 4160-01-F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

[Document Identifier: HCFA-9044]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Health Care Financing Administration.

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Health Care Financing Administration (HCFA), Department of Health and Human Services, is publishing the following summary of proposed collections for public comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Type of Information Collection Request: Extension of a currently approved collection; *Title of Information Collection:* Provider Reimbursement Manual, Part 1—Chapter 27, Section 2721, 2722 and 2725, Request for Exception to ESRD Composite Rates and Supporting Regulations in 42 CFR 413.170; *Form No.:* HCFA-9044 (OMB# 0938-0296); *Use:* Sections 2721, 2722 and 2525 of the Provider Reimbursement Manual describe the information ESRD facilities must submit in justifying an exception request to their composite rate for outpatient dialysis services.; *Frequency:* On occasion; *Affected Public:* Business or other for-profit, Not-for-profit institutions and Federal Government; *Number of Respondents:* 275; *Total Annual Responses:* 275; *Total Annual Hours:* 13,200.

To obtain copies of the supporting statement and any related forms for the proposed paperwork collections referenced above, access HCFA's Web Site address at <http://www.hcfa.gov/reg/prdact95.htm>, or E-mail your request, including your address, phone number, OMB number, and HCFA document identifier, to Paperwork@hcfa.gov, or call the Reports Clearance Office on (410) 786-1326. Written comments and recommendations for the proposed information collections must be mailed within 30 days of this notice directly to the OMB desk officer: OMB Human Resources and Housing Branch, Attention: Allison Eydt, New Executive Office Building, Room 10235, Washington, D.C. 20503.

Dated: January 7, 1998.

John P. Burke III,
HCFA Reports Clearance Officer, HCFA Office of Information Services, Information Technology Investment Management Group, Division of HCFA Enterprise Standards.
