

and elevated blood pressure are two problems that disproportionately affect minority groups. Establishing a link between blood pressure and lead exposure, especially utilizing two new biomarkers of lead exposure, bone lead and serum lead, can provide a new tool

for dealing with elevated blood pressure nationwide. This request is for a 3-year extension. Two previously approved questionnaires will continue to be used to collect socioeconomic data, and data pertaining to risk factors for elevated blood pressure and lead exposure. A

new questionnaire assessing social stress (Scale of Chronic Social Role Stressors) and a 16 item, four response choice scale will be added to better control for social stress factors affecting blood pressure. There is no cost to respondents.
