

Improvement Act requires the Service to establish new compatibility policy and regulations within two years of enactment. There are no other directives in the Refuge Improvement Act for specific policy updates; however, the Service desires to move forward expeditiously on the specific policies listed in this notice to incorporate the most important provisions of the Refuge Improvement Act into all management functions. The Service estimates that draft Service Manual chapters for these issues will be available for public review and comment beginning in May 1998.

This notice and the public participation in this implementation process is being conducted in accordance with the policy and rulemaking requirements of the Administrative Procedures Act (5 U.S.C. 553), other appropriate Federal laws and regulations, including the National Wildlife Refuge System Improvement Act of 1997 (Pub. L. 105-57), Executive Order 12996, and associated Service policies and procedures.

Dated: January 16, 1998.

Notice of Availability of the Draft Supplement to the Final Environmental Impact Statement for a TransColorado Gas Transmission Project; Colorado and New Mexico

AGENCY: Bureau of Land Management, Department of the Interior, and Forest Service, Department of Agriculture.

ACTION: Notice of Availability of a Supplement to The Final Environmental Impact Statement TransColorado Gas Transmission Project; Colorado and New Mexico.

SUMMARY: In accordance with the National Environmental Policy Act, the Bureau of Land Management (BLM), as lead agency, and in cooperation with the U.S. Forest Service (USFS) has prepared a Draft Supplement (Supplement) to the Final Environmental Impact Statement (FEIS) for the TransColorado Gas Transmission

(TransColorado) project on federal lands in Colorado and New Mexico.

TransColorado is the proponent. Lands managed by the BLM in the Montrose, Craig, and Grand Junction Districts in Colorado, and the Farmington District in New Mexico, and the USFS in the Uncompahgre and San Juan National Forests, Colorado, are crossed by the TransColorado pipeline project. The Supplement addresses the environmental impacts of the construction, operation, maintenance, and ultimate abandonment of known proposed route changes and minor realignments (less than 100 ft.) of the approved pipeline and right-of-way (ROW) grant COC-51280, and the impacts of the proposed construction and use of known additional temporary work areas adjacent to the approved ROW or, proposed ROW route changes or minor realignments. This Supplement will also address the impacts of the construction and use minor realignments and alternative temporary work areas in unspecified locations. These unspecified temporary work areas and minor realignments will be addressed to accommodate conditions that might be encountered during construction. Also addressed in the Supplement are proposed modifications to several environmental protection measures contained in the original right-of-way (ROW) grant and Record of Decision (ROD).

Please focus comments on the proposed actions and alternatives in the Supplement to the FEIS.

DATES: The 60-day public comment period for the Draft Supplement runs from January 23, 1998 until March 9, 1998.

Written comments on the Draft Supplement must be submitted or postmarked no later than March 9, 1998. Under the authority of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (37 Stat. 567), BLM issued a 50 foot-wide ROW grant on December 4, 1997, accompanied by a 25 foot-wide TUP, excepting 1.7 miles near Grand Junction, Colorado. The FERC issued TransColorado a Certificate of Public Convenience and Necessity on June 3, 1994. TransColorado completed the 22.5 mile Phase I of the project in December, 1996. The proponent is now prepared to construct the remainder of the pipeline during 1998.
