[Docket Nos. CP96-809-000, et al. and CP96-810-000]

Maritimes & Northeast Pipeline, L.L.C.; Notice of Availability of the Draft Environmental Impact Statement for the Proposed Maritimes Phase II Project

January 30, 1998.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared this draft environmental impact statement (DEIS) on the natural gas pipeline facilities proposed by Maritimes & Northeast Pipeline, L.L.C. in the above-referenced dockets and referred to as the Maritime Phase II Project.

The staff prepared the DEIS to satisfy the requirements of the National Environmental Policy Act. The staff concludes that approval of the proposed project, with appropriate mitigating measures as proposed and

recommended, would have limited adverse environmental impact.

The DEIS assesses the potential environmental effects of construction and operation of the following facilities in Maine:

- A total of about 347.0 miles of pipeline, consisting of 200.1 miles of 24- and 30-inch-diameter mainline between Westbrook in York County and Woodland (Baileyville) in Washington County, and five laterals totaling 146.9 miles of 4- to 16-inch-diameter pipeline;
- About 31,160 horsepower of new compression at two new compressor stations;
- Twelve new meter stations; and
- Associated aboveground facilities, including 35 block valves.

The purpose of the proposed facilities would be to transport 440,000 thousand cubic feet per day of natural gas to existing and new natural gas markets in Maine and the northeast. These natural gas supplies would come from new reserves being developed in offshore Nova Scotia, Canada.
