**Funding Priorities for Conservation Project Support Program**

The National Museum Services Board, by notice published in the **Federal Register**, may establish funding priorities among the types of projects. IMLS Conservation Project Support guidelines identify four broad categories of museum collections: non-living; systematics/natural history collections; living collections/animals; and living collections/plants.

For each of the categories, with the exception of living collections/animals, the funding priority is a general conservation survey of collections and environmental conditions including development of institutional-range conservation plans. For living collections/animals the funding priority is research for improved conservation techniques.
