MSHA published the notice to afford an opportunity for interested persons to comment on the ANPRM and for commenters to provide additional information and data on machine design, operating procedures, and miners’ experiences with roof-bolting machines.

The comment period was scheduled to close on February 9, 1998; however, in response to commenters’ requests for additional time to prepare their comments, MSHA is extending the comment period until March 9, 1998. The Agency believes that this extension will provide sufficient time for all interested parties to review and comment on the ANPRM. All interested parties are encouraged to submit their comments on or prior to March 9, 1998.
