[Project No. 10847-001]

Creamer and Noble; Notice of Intent To Prepare an Environmental Impact Statement (EIS) and Conduct Public Scoping Meetings and a Site Visit

February 11, 1998.

The Federal Energy Regulatory Commission (Commission) is reviewing an application for an original license for the proposed 500-megawatt Crystal Creek Hydropower Project, No. 10847-001. The pumped-storage project, proposed by Creamer and Noble Energy, Inc., would be located about 26 miles northeast of San Bernardino, California. About 237 acres of the project would be on lands within the San Bernardino National Forest, administered by the U.S. Forest Service (FS) and about 270 project acres would transect private property and lands administered by the U.S. Bureau of Land Management (BLM), Barstow Resource Area.

The Commission intends to prepare an Environmental Impact Statement (EIS) for the Project in accordance with the National Environmental Policy Act. In the EIS, we will consider reasonable alternatives to Creamer and Noble's proposed project, and analyze both site-specific and cumulative environmental impacts of the project, including an economic and engineering analysis.

The EIS will be issued and circulated to those on the mailing list for this project. All comments filed on the draft EIS will be analyzed by the staff and considered in a final EIS. The staff's conclusions and recommendations presented in the final EIS will then be presented to the Commission to assist in making a licensing decision.

Scoping

We are asking agencies, Indian Tribes, non-governmental organizations, and individuals to help us identify the scope of environmental issues that should be analyzed in the EIS, and to provide us with information that may be useful in preparing the EIS.

To help focus comments on the environmental issues, a scoping document outlining subject areas to be addressed in the EIS will be mailed to those on the mailing list for the project. Those not on the mailing list may request a copy of the scoping document from the project coordinator, whose telephone number is listed below.

Those with comments or information pertaining to this project should file it with the Commission at the following address: David P. Boergers, Acting Secretary, Office of the Secretary, Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426.

The comments and information are due to the Commission by April 10, 1998. All filings should clearly show the following on the first page: Crystal Creek Hydroelectric Project, FERC No. 10847-001.

In addition to written comments, we're holding two scoping meetings to solicit any verbal input and comments you may wish to offer on the scope of the EIS. An agency scoping meeting will begin at 8:30 a.m. on Wednesday, March 11, 1998, at the San Bernardino Valley Municipal Water District, 1350 South "E" Street, San Bernardino, California. A public scoping meeting will begin at 6:30 p.m. on Wednesday, March 11, 1998, at the Lucerne Valley Community Center, 33187 Highway 247, Lucerne Valley, California. The public and agencies may attend either or both meetings, and we'll treat written and verbal responses equally. There will also be a visit to the proposed project site on March 10, 1998, to become more familiar with the proposed project. More information about these meetings and site visit is available in the scoping document.

Any questions may be directed to Mr. Carl Keller, project coordinator, at (202) 219-2831, Federal Energy Regulatory Commission, Office of Hydropower Licensing, 888 First Street, NE, Washington, D.C. 20426.
