

Burden Statement: The burden covered by this document is limited because little additional Tier 1 activity is anticipated and the EPA is in negotiation with the regulated parties on Alternative Tier 2 requirements for most of the registered products for which standard Tier 2 testing would otherwise be required. This ICR will be amended once the Alternative Tier 2 requirements are established. Thus, over the next three years only one Tier 1 submission and one standard Tier 2 submission are anticipated, with a total burden of 10,400 hours and cost of \$1 million. The annual public reporting and recordkeeping burden for this collection is estimated to average 3,467 hours. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Manufacturers of gasoline, diesel fuel, and fuel additives.

Estimated Number of Respondents: 2.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 3,467 hours.

Estimated Total Annualized Cost Burden: \$154,000.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including the use of automated collection techniques, to the following addresses. Please refer to EPA ICR Number 1696.02 and OMB Control Number 2060-0297 in any correspondence.
