BILLING CODE 1650-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-295 and 50-304]

Commonwealth Edison Company; Notice of Withdrawal of Amendment to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Commonwealth Edison Company (ComEd, the licensee) to withdraw its November 7, 1996, applications for proposed amendments to Facility Operating License Nos. DPR-39 and DPR-48, issued to the licensee for operation of the Zion Nuclear Power Station, Units 1 and 2, located in Ogle County, Illinois. Notice of Consideration of Issuance for these amendments was published in the **Federal Register** on December 18, 1996 (61 FR 66704-05).

The first proposed amendment would have modified the facility technical specification (TS) surveillance requirements from verifying greater than or equal to 17 percent steam generator secondary side wide range water level to greater than or equal to 17 percent steam generator secondary side narrow range water level. The second proposed amendment would have changed the TS values for the reduced power range neutron flux high setpoint trip that are specified when one or more code main steam safety valves are inoperable. The third proposed amendment would have clarified the TS operability requirements for the residual heat removal loops during core alteration operations. By letter dated February 12, 1998, ComEd withdrew the amendment requests because they are no longer needed. By letter dated February 13, 1998, ComEd certified that they have permanently ceased operations at Zion Nuclear Power Station, Units 1 and 2. Since ComEd has permanently ceased operations at Zion Station, the license amendment requests submitted on November 7, 1996, are no longer needed.

For further details with respect to this action, see (1) The three applications for amendment dated November 7, 1996,

and (2) the staff's letter dated February 23, 1998.

These documents are available for public inspection at the Commissions Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Waukegan Public Library, 128 N. County Street, Waukegan, Illinois 60085.

Dated at Rockville, Maryland, this 23rd day of February 1998.

For the Nuclear Regulatory Commission.

Lawrence W. Rossbach,

Project Manager, Project Directorate III-2, Division of Reactor Projects—III/IV, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-331]

IES Utilities Inc., Central Iowa Power Cooperative, Corn Belt Power Cooperative; Notice of Consideration of Issuance of Amendment to Facility Operating License Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-49 issued to IES Utilities Inc., Central Iowa Power Cooperative, and Corn Belt Power Cooperative (the licensee) for operation of the Duane Arnold Energy Center, located in Linn County, Iowa.

The proposed amendment would change the operability requirement for the Standby Liquid Control system to Run/Power Operations and Startup.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or
