SUPPLEMENTARY INFORMATION: The annual crop census is to be taken on all operating Reclamation projects, along with related statistics, including water distribution, primarily for use as a tool in administering, managing, and evaluating the Federal Reclamation program. The statistics are used extensively in the administration of the repayment and water service contracts. They also are used in the determination of the irrigators ability to pay and in the economic evaluation of the projects, including benefit/cost analysis and Class I equivalency. These statistics are utilized in the determination of subsidies to irrigation and in the administration of foreign treaties, such as the North American Free Trade Agreement (NAFTA), where estimates of subsidies to agriculture are required.
