NATIONAL SCIENCE FOUNDATION

Permit Applications Received Under the Antarctic Conservation Act of 1978 (P.L. 95-541)

AGENCY: National Science Foundation.

ACTION: Notice of permit applications received under the Antarctic Conservation Act of 1978, Pub. L. 95-541.

SUMMARY: The National Science Foundation (NSF) is required to publish notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act at Title 45 Part 670 of the Code of Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to these permit applications by April 1, 1998. Permit applications may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, Room 755, Office of Polar Programs, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230.

FOR FURTHER INFORMATION CONTACT:

Nadene G. Kennedy at the above address or (703) 306-1033.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95-541), has developed regulations that implement the "Agreed Measures for the Conservation of Antarctic Fauna and Flora" for all United States citizens. The Agreed Measures, developed by the Antarctic Treaty Consultative Parties, recommended establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas as requiring special protection. The regulations establish such a permit system to designate Specially Protected Areas and Sites of Special Scientific Interest.

The application received as follows:

Permit Application: 99-001

1. *Applicant:* Gerald L. Kooyman, Center for Marine Biotechnology and Biomedicine, Scripps Institution of Oceanography, University of California, San Diego, La Jolla, California 92093-0204.

Activity for Which Permit is Requested: Taking, and Import into the U.S.

The applicant proposes to capture and restrain 6 adult Emperor penguins for 30 minutes while a 260 gram satellite transmitter is glued to the feathers. The transmitters expected to remain attached for three months before shedding. Twenty Emperor penguins will be captured and held for twenty minutes. During captivity stomach samples will be obtained by stomach lavage. These procedures are the only means of determining diet preferences, diving behavior and distribution patterns of individual birds in the Ross Sea. None of this information is known about Emperor penguins occurring in the Ross Sea during the winter.

Location: Ross Sea pack ice. Access is via the R/V Nathaniel B. Palmer.

Dates: May 1, 1998 to August 1, 1998.

Permit Application: 99-002

2. *Applicant:* William R. Fraser, Department of Biology, Montana State University, Bozeman, Montana 59717.

Activity for Which Permit is Requested: Taking, and Import Into the U.S.

The applicant, as a participant in the Long-Term Ecological Research Program (LTER), is seeking to understand the factors that control the abundance and distribution of seabirds within and between seasons in the LTER study region. Part of this research encompasses understanding seasonal variability in the diets of the region's most common seabirds, of which the early winter period still remains of the least known and one of the most important from an ecological perspective. Research on seabirds in general suggests that winter feeding conditions may determine the survival of annual cohorts and breeding adults, and adult breeding condition in spring, in effect, some of the key variables that influence long-term demography.

The applicant proposes to capture up to 100 Adelie penguins, 100 Chinstrap penguins and 50 Emperor penguins in order to weigh, measure and obtain stomach contents through stomach lavage. The applicant also proposes to kill up to 75 Snow Petrels, 50 Southern Fulmars and 75 Antarctic Petrels in order to obtain measurements, weights and study stomach contents. These seabirds will then be imported into the U.S. for subsequent distribution to museums and teaching collections at various institutions, thus ensuring the full use of these specimens.

Location: Bellingshausen Sea, vicinity of Marguerite Bay. Access is via the R/V Lawrence M. Gould.

Dates: May 1, 1998 to September 1, 1998.

Nadene G. Kennedy,

Permit Officer, Office of Polar Programs.
